

CONTAINERS READY TO GO AHEAD!

Storage capacity has nearly doubled to accommodate up to 2,000 containers.

The successful public/private partnership between the Port of Greater Baton Rouge and SEACOR AMH has produced steady increases in the number of containers handled at the Port's barge terminal.

As a result, a project to create nearly 4 acres of additional paved container storage capacity has been successfully completed. The yard is now capable of handling approximately 2,000 containers including containers measuring 40 feet, versus 20 feet.

Port Executive Director Jay Hardman said that the response from local industry has been very positive. "We have been able to build in more efficiency in our COB service, which translates to a smoother, more fluid operation, lowers costs, and keeps the service competitive," says Hardman. "As the service continues to grow, it's catching the attention of more and more potential customers."
