(800) 6538-4097 | (386) 575-2000
sunshine811.com

Thank you for your interest in becoming a member of Sunshine 811. Membership is mandatory per s.556.104 of the "Underground Facility Damage Prevention and Safety Act," Chapter 556, Florida Statutes.

Membership Process

1. Complete the attached membership application and send it to the Member Services Department by email, fax or regular mail. (Instructions for completing the application appear on the next page.) Member Services processes the application and then notifies you by email of your login information.
2. Build your service area using the system polygon tools or by uploading shape files.
3. Submit the Database Activation Form to inform Member Services that you have completed building your service area. Member Services will verify the pending changes in your database with the form and activate your service area. At this point, you will begin receiving locate tickets.

Membership Costs

Members are billed monthly at the rate of 87 cents per standard ticket transmission, 87 cents per late notice transmission, and 46 cents per duplicate ticket transmitted.

Member Services Contact Information

Our full-service Member Services Department is available Monday through Friday, 7 a.m. to 5 p.m. to answer your questions, help you in the membership process and provide technical support.

Phone: (386) 575-2009 or (800) 651-6720
Email: memberservices@sunshine811.com
Fax: (386) 575-2039
US Mail: 11 Plantation Road, DeBary, FL 32713

Our website, www.sunshine811.com, has information on your responsibilities under Chapter 556, F.S. You can stay up to date on news and events by subscribing to one of our email lists, RSS feed or following us on Twitter (@florida811) or Facebook (@sunshine811).

A damage prevention liaison for your county is available to visit you and provide education to your employees.

Design Request Fee Information

The four design service levels are as follows and were adapted from the Florida Department of Transportation's Utility Accommodation Manual (UAM). *For a complete description of these levels, see the UAM, Document number 710-020-001-d.* Members are not required to offer all four levels of design services. For those design services that you will offer, please provide the fee information including any applicable dollar amounts and clarifications. If your company chooses not to offer a particular design service, leave the "Fee information" blank. If the fee information is left blank, the call center will use the default message, "Services not provided by member" as the response. The fee information is limited to 65 characters of text including spaces. Punctuation marks, with the exception of the dollar sign (\$), will be ignored.

- Utility records review (Level D in UAM – referred to as Level 1 on your design ticket) - This is information obtained solely from a review of individual utility records. This information does not show all underground facilities or structures in an area.
Fee information:
- Topographic surveying of above-ground utility features (Level C in UAM – referred to as Level 2 on your design ticket) - This information supplements the review of utility records and involves the topographic surveying of visible, above ground utility features such as poles, hydrants, valve boxes, circuit breakers, etc.
Fee Information:
- Designating technologies to obtain the horizontal underground facility location (Level B in UAM – referred to as Level 3 on your design ticket) - This is an application where the ground is scanned using designating technologies (i.e. equipment used by contract locators) to get a horizontal layout of the underground facility and other underground structures on the site.
Fee information:
- Physical exposure of the underground facility (Level A in UAM – referred to as Level 4 on your design ticket) - This provides the highest level of accuracy for facility locations in three dimensions and involves physically exposing the underground facilities using manual, mechanical and nondestructive (e.g. vacuum excavation) methods to expose the facilities.

Receiving Design Tickets

When a surveyor or engineer requests a design ticket, they are given a list of all design request engineers for that ticket. It is then the requestor's responsibility to contact the member for design services. You may elect to receive these tickets at a cost of 87 cents each. If you choose "no" below, you still need to complete Sections 1, 2 and 3.

Do you wish to receive design tickets at a cost of 87 cents each? Yes No

Section IV: Additional Contacts for Internet Use

Sunshine 811 RMA Application

Sunshine 811 uses the Irth Host System for its ticket management. This is an online system, meaning that you can access your database, process location requests, view your ticket history and perform a variety of other functions over the Internet. Please complete the contact information requested below for as many individuals within your company to which you would like to give this access. For your security, you may limit the permissions that an individual may have. Each permission is described below.

Service Area..... Add & delete grids on your Database, Import Service Area Maps (Service Area Management), view ticket history, view tickets in queue, request resends, and perform Positive Response functions.

Service Area (limited)... View ticket history, view tickets in queue, response manager, request resends, and perform Positive Response functions.

Member Research View ticket history, view tickets in queue, and view responses.

Internet Ticket Entry Create locate tickets over the Internet, view ticket history, response manager, view tickets in queue, request resends, and perform Positive Response functions.

Response Manager For users that will only need to perform Positive Response functions.

Total: 5

Sample End of Day Summary

The End of Day Summary lists all of the tickets you received for that day. It includes the sequence number (order in which the ticket was received), ticket number and time delivered.

Note: What follows is a breakdown of the format in which we transmit locate tickets

Our ticket number is 8 characters long (e.g. 00210123).

There is no fixed limit to the length of location or remarks. There can be any number of grids or members. Fields will not be padded to their maximum lengths, so where there are variable length fields such as county or the contractor's city, the position of the following field on the line will not be in a fixed column. Grids will always be spaced evenly.

The line that starts with "Old Tkt" may be omitted if there is no prior ticket number and it is the first revision (-000) of a ticket.

The following fields will not be transmitted if they are empty:

- a. The second address of an address range.
- b. The first and second cross streets.
- c. Any phone number extension
- d. Any pager, mobile, or fax number
- e. The email address
- f. Second company address field
- g. ZIP code
- h. The Contact person's name
- i. Latitude/Longitude
- j. The work being Done For field
- k. The voice channel (Chan) field
- l. The reference (Ref) field

The county field is actually 40 characters max in the database but the longest county name in Florida is 14 characters in length.

The first transmitted line is in the form:
