The Life Script

A script is a personal life plan which an individual decides early in life and is based upon his or her interpretation of the external and internal events which affect them. The script is a decisional model - this is very important - if I chose my own script then at any time given the right circumstances I can choose to make a change in my script. (When this change takes place in therapy the client is said to have made a Redecision.)

A potential script decision is made when a person discounts his own free child needs in order to survive. Only after several discounts does the decision become part of the script unless the situation carried a great deal of significance such as the death of a parent or sibling. Script Decisions are the best the child can manage in the circumstances. Yesterday’s best choice made by the child in a land of giants may now be very limiting to the grown adult. People follow their script because of the pay off, a familiar feeling, attempting to avoid the loss of love and in an attempt to gain love.

SCRIPT MESSAGES come from:

1) **MODELLING** by parents, siblings, others demonstrating how to = the Programme (accepted Adult messages).
2) **ATTRIBUTIONS**, the big person in Parent defining the little person in some way, e.g. “You’re just like .....”.
3) **SUGGESTIONS**, indirectly giving the message from parent, e.g. “Keep at it until it’s right”. Be Perfect).
4) **INJUNCTIONS** from the child ego state making demands on the person, either DO or DON’T.

NB: Messages can frequently contradict each other.

**DRIVERS** (Described by Taibi Kahler) From the Parent Ego State stating that the child will be OK if he/she follows a message which says:-

You will be OK if you..... Try Hard - Be Strong - Hurry Up - Be Perfect - Please Me –

**TWELVE INJUNCTIONS** (Described by the Gouldings in teh book Changing Lives Through Redecision Therapy). Injunctions come from the infants parents scared or angry Child ego state:-Don’t be, Don’t be you, Don’t, Don’t be Important, Don’t belong, Don’t be close, Don’t be well / sane, Don’t think, Don’t feel, Don’t be a child, Don’t grow, Don’t succeed.

It is important to note that the child responds to these injunctions and makes a script decision... It is these negative script decisions which will possibly causing difficulty as a grown up.

Permissions are also given to the child, these will be the opposite to the injunctions, e.g. Do think, etc.

**The OK Coral**: One of Berne's best know concepts is the idea that folks are born OK, The phrase I am OK - You are OK has become a part of folk language...

In infancy, often pre-verbally the infant will make a decision as to how they related to others and themselves ... This is called their existential life position. Early life experiences will determine the person’s Existential or Life position. Once decided upon, the Life Position influences how the person thinks, feels and behaves. There are four basic life positions and Frank Ernst developed these into the well known OK Corral.
In this diagram I have deliberately have called them mother and father power in order to reflect their power imbalance over their infant. The Infant makes decisions in response to each of the messages:

D = Driver messages (Often called counter injunction)

P = Programme (How to's...)

I = Injunction (Don'ts, or script messages)

**SCRIPT QUESTIONNAIRE** These questions are designed to gain information from the client which enables the therapist to construct a script matrix, a picture of both the messages which were passed onto the infant and the decisions which the infant made. (These 10 questions are based on Maggie and Jeff White's article in the Jan 86 TAJ.
