

Popgeni (Sweden)

Americana and country is a difficult art. The respect and feeling for the Idols and the genre's origins to be balanced against its own talent and feeling to the code will be correct. Texas-based singer-songwriter Brant Croucher released in mid-December album "Blanco County Lights" where common earthy things as women , drinks , trucks and a few well-known country music themes discussed.

But what sets Croucher from the square middle-of -the-road variant with too big cowboy hat is his way of building songs and dress them in the right musical arrangements. Honestly and truly are the watchwords of the 11 tracks from scratch takes, nice side track, to the acoustical people feeling, swamp groove, piano - driven ballads and altcountrypop with rock bite.

Brant Croucher's songs are common on radio stations in Texas and pops more often up on the airwaves around the United States and Europe. With us, then?
