

## **What are the approved fence stains?**

Wood fencing must receive an initial and periodic finish. The purpose is to retain uniformity of color throughout the community. It is recognized that when an older fence is re-stained, it is difficult to achieve the intended color, even when the recommended stains are used. It should be the intention of the homeowners to match the color of their fences as closely as possible to one of the stain colors approved by the Bridlewood HOA.

### **NO PAINTS OR OPAQUE STAINS ARE TO BE USED.**
