

Algebra 1 OnTrack

Live lectures. Small classes. Weekly assessments.

No matter what's happening, Elite will keep you *on track*.

What is Elite OnTrack?

OnTrack is Elite's response to the current pandemic. No, we're not talking about COVID-19; we're talking about the **pandemic in education**.

Studies have shown that students are falling behind like never before. Although everyone hopes school will resume "as normal" sooner than later, the fact remains that students with college aspirations can't afford to put their learning on hold.

OnTrack is Elite's way of making sure that students are learning what they need to succeed at the next level and validating their grades with exceptional test scores.

Whether colleges want to admit it or not, this year, highly selective universities will have to rely on standardized tests such as AP Exams and SAT Subject Tests to put students' online grades in context.

With **3 hours of LIVE LECTURE** every week as well as rigorous **AP-style assessments**, Elite is committed to making sure students stay on track no matter what is or isn't happening with their distance learning at school.

Join the course any time!

What will be covered?

Elite's Algebra 1 OnTrack curriculum has been aligned with national standards and will teach you everything you need to excel at the next level. We will cover the following units over the span of 24 weeks.
