1. Start at the location for the top hole #1 on the diagram.
2. Use a level or a weighted string to determine a true vertical line descending from that point.
3. Measure vertically down that line 11.5” to intersection point
4. Use a level or a square to establish a horizontal line at that point.
5. Measure along that line 8.75” to point 2. This will be the second screw hole.
6. Temporarily install the sculpture using those two points. Mark the other mounting hole with the sculpture in place.
7. Remove the sculpture. Install the appropriate anchors and permanently remount the sculpture on the wall.
