Unveiled at VOLTANY the Vanishing Twin Chair is a rebirth of the Pagan Chair released in 2014. The Vanishing Twin Chair was a part of a installation that featured a daily cycle of ritual seating arrangements interacting with the gallery booths surrounding.

The GEOMETRY IS GOD line is driven by a fascination with Pagan and Alchemical symbolism and ancient geometries. With this series, we have attempted to reinterpret these markings without losing the potency of their primary aesthetic. The goal is to make furniture that is symbolically dense, and as a result the collection could be described as functional sculpture.
