# MATERIAL LUST

DERMA Skin II, 2016

Core spun alpaca from farms in Colorado, Ohio and Maine, three strand 3/4" rope, black wool, recycled cotton, wool, and cashmere sweaters, calf leather, cotton, merino wool, rubber tool dip, cotton jersey on a cotton warp.

Measures 6' x 9' Flat

Made to order. Lead time 8 Weeks.

DERMA was created in collaboration with artists To Dødsfall, whose hand-woven textiles take shape on floor looms in Brooklyn. Borrowing from the eccentricities of the human body –growths and scarring among them– the collection is an exploration in material and surface manipulation.

By combining simple technique with a synthesis of locally sourced and found materials, the collection subverts the order normally found in woven structure for meandering lines, malformed textures, and a sea of multitudinous blacks.
