

HSAjet TIPC XJ print controller

Touch Screen Control.
The TIPC XJ500 printer system
is the most powerful and versatile
platform available.

A powerful PC controller running the OBJ software in native mode. Print design and operation can be managed locally with all the power of the rich OBJ software unlocked. The powerful PCI based CB PCB connects up to four XJ500 70mm printheads. Multiple carton side printing is possible. Each printhead printing unique graphics and realtime variable data.

The high quality printing to a resolution of 185dpi permits the on line printing of fine quality logo images and barcodes. Many common barcode symbols are supported including EAN/UPC 128, ITF, EAN13 and many others.

The high contrast inks produce good quality barcodes on virgin kraft liner as well as recycled materials. Solvent based inks are available for over printing claycoat liners and varnish finishes.

FEATURES

- Full 15" screen graphical touch screen system. Touchscreen design can be user configured for specific application needs.
