MultiPlus-II Inverter/Charger
MultiPlus-II 48/3000/35-32 & 48/5000/70-50

A MultiPlus, plus ESS (Energy Storage System) functionality
The MultiPlus-II is a multifunctional inverter/charger with all the features of the MultiPlus, plus an external current sensor option which extends the PowerControl and PowerAssist function to 50A resp. 100A. The MultiPlus-II is ideally suited for professional marine, yachting, vehicle and land based off-grid applications. It also has built-in anti-islanding functionality, and an increasingly long list of country approvals for ESS application. Several system configurations are possible. For more detailed information see the ESS Design and configuration manual.

PowerControl and PowerAssist - Boosting the capacity of the grid or a generator
A maximum grid or generator current can be set. The MultiPlus-II will then take account of other AC loads and use whatever is extra for battery charging, thus preventing the generator or grid from being overloaded (PowerControl function).
PowerAssist takes the principle of PowerControl to a further dimension. Where peak power is so often required only for a limited period, the MultiPlus-II will compensate insufficient generator, shore or grid power with power from the battery. When the load reduces, the spare power is used to recharge the battery.

Solar energy: AC power available even during a grid failure
The MultiPlus-II can be used in off grid as well as grid connected PV and other alternative energy systems. It is compatible with both solar charger controllers and grid-tie inverters.

Two AC Outputs
The main output has no break functionality. The MultiPlus-II takes over the supply to the connected loads in the event of a grid failure or when shore/generator power is disconnected. This happens so fast (less than 20 milliseconds) that computers and other electronic equipment will continue to operate without disruption.
The second output is live only when AC is available on the input of the MultiPlus-II. Loads that should not discharge the battery, like a water heater for example, can be connected to this output.

Virtually unlimited power thanks to parallel and three phase operation
Up to 6 Multis can operate in parallel to achieve higher power output. Six 48/5000/70 units, for example, will provide 25 kW / 30 kVA output power with 420 Amps charging capacity.
In addition to parallel connection, three units of the same model can be configured for three phase output. But that’s not all: up to 6 sets of three units can be parallel connected for a 75 kW / 90 kVA inverter and more than 1200 Amps charging capacity.

On-site system configuring, monitoring and control
Settings can be changed in a matter of minutes with VEConfigure software (computer or laptop and MK3-USB interface needed).
Several monitoring and control options are available: Color Control GX, Venus GX, Octo GX, CANvu GX, laptop, computer, Bluetooth (with the optional VE.Bus Smart dongle), Battery Monitor, Digital Multi Control Panel.

Remote configuring and monitoring
Install a Color Control GX or other GX product to connect to the internet.
Operational data can be stored and displayed on our VRM (Victron Remote Management) website, free of charge.
When connected to the internet, systems can be accessed remotely, and settings can be changed.
Our free remote monitoring website (VRM) will display all your system data in a comprehensive graphical format. System settings can be changed remotely via the portal. Alarms can be received by e-mail.

VRM Portal

Provides intuitive system control and monitoring. Besides system monitoring and control the CCGX enables access to our free remote monitoring website: the VRM Online Portal. Besides system monitoring and control the CCGX enables access to our free remote monitoring website: the VRM Online Portal. Provides intuitive system control and monitoring.

![Connection Area](image)

**Color Control Panel (CCGX)**

- Measures battery voltage and temperature and allows monitoring and control with a smart phone or other Bluetooth enabled device.
- Provides intuitive system control and monitoring.
- Provides access to the VRM Online Portal.
- The CCGX enables remote monitoring and control.

**VRM app**

- Monitor and manage your Victron Energy system from your smart phone and tablet. Available for both iOS and Android.
- VRM app allows remote monitoring and control.

**VE.Bus Smart Dongle**

- Measures battery voltage and temperature and allows monitoring and control with a smart phone or other Bluetooth enabled device.
- Provides intuitive system control and monitoring.

**CHARGER**

- Input voltage range: 187-265 VAC
- Input frequency: 45 – 65 Hz
- Charge voltage: 97.6 V
- Charge voltage: 55.2 V
- Storage mode: 52.8 V
- Maximum battery charge current: 35 A
- Battery temperature sensor: Yes

**GENERAL**

- Auxiliary output: 32 A
- External AC current sensor (optional): 50 A
- Programmable relay: Yes
- Protection: 1 - g
- Configuration: 2
- For parallel and three phase operation, remote monitoring and system integration
- General purpose comm. port: Yes, 2x
- Remote on/off: Yes
- Operating temperature range: -40 to +65°C
- Humidity (non-condensing): max 95%

**ENCLOSURE**

- Material & Colour: steel, blue RAL 5012
- Protection category: IP22
- Battery-connection: Screw terminals 13 mm² (6 AWG)
- Weight: 18 kg
- Dimensions (hxwxd): 506 x 275 x 147 mm

**STANDARDS**

- Safety: EN-IEC 60335-1, EN-IEC 60335-2-9, EN-IEC 62109-1, IEC 62109-2
- Emission, Immunity: EN-IEC 61000-3-2, EN-IEC 61000-3-3, IEC 61000-6-1, IEC 61000-6-2, IEC 61000-6-3
- Uninterruptible power supply: IEC 62040-1, AS 62040.1
- 1) Can be adjusted to 60 Hz
- 2) Protection key:
  a) output short circuit
  b) overload
  c) battery voltage too high
  d) battery voltage too low
  e) temperature too high
  f) 230 VAC on inverter output
  g) input voltage ripple too high

**Current sensor 100A-50mA**

- To implement PowerControl and PowerAssist and to optimize self-consumption with external current sensing.
- Maximum current: 50A resp. 100A.
- Length of connection cable: 1 m.

**Digital Multi Control Panel**

- A convenient and low-cost solution for remote monitoring, with a rotary knob to set PowerControl and PowerAssist levels.
- Allows monitoring, with a rotary knob to set PowerControl and PowerAssist levels.
- Provides intuitive system control and monitoring.
- Provides access to the VRM Online Portal.
