

**House SD 2587 -An act building for the future of the Commonwealth.** Reps. Kulik and Peake.

Are you often stuck in traffic, wish you could walk or bike to more places, want seniors to be able to stay in the communities where they raised their families? Do you want to make sure we develop in ways that protect natural areas and keep parks and green spaces plentiful? How we zone and where we develop is vitally important and impacts so many aspects of our lives. There is legislation that will encourage a more rational approach to zoning and development that will support neighborhoods and families, preserve open space, promote healthy communities, and give cities and towns the tools they need to make smart development choices.

### **House of Representatives**

Representative Stephen Kulik
