

The Pharma Industry in the Learning Health System

Laura Crawford
2016 Dec

All stakeholders win in a connected health ecosystem

In the Learning Health System, fragmented parts of the health ecosystem are connected so that data, information, and evidence can **flow** more efficiently.

This flow facilitates more rapid learning and enables us to progress on the goals we all share:

1. Improved quality of care
2. Reduced errors
3. Reduced costs
4. Faster impact of innovation (reduced time lag for knowledge translation)

What can pharma contribute to the Learning Health System?

1. Faster, patient-centered drug development
2. Clinical trial data
3. Real world evidence
4. Drug information
5. Deep disease state knowledge (e.g., non-branded health ed materials)
6. Continuing progress toward personalized medicine
7. Deep analytics expertise
8. Non-medical expertise such as knowledge management, other in the pre-competitive space (e.g., investigator databases)
9. Staffing
10. Funding

Opportunities for pharma in the Learning Health System

1. **Faster, patient-centered drug development:**

- Design trials and real world studies to measure what patients value
- Make clinical trials more convenient for patients
- Increase enrollment in clinical trials
- Make clinical trials a care option

2. **Improved, appropriate access to data for...**

- Improved safety surveillance
- Generating real world evidence
- Enabling personalized medicine
- Improved hypothesis generation

3. **Appropriate and more efficient evidence dissemination:**

- Disseminate our clinical trial and real world evidence more efficiently as needed at the point of care
- Reducing the appalling 17 year gap
- Increasing the impact of innovation

How can pharma help create the Learning Health System?

1. Advance the LHS vision
2. Help plan and build
3. Spread the word – inside and out
4. Learn and prepare

How can pharma help create the Learning Health System? continued

1. Advance the LHS vision:

- Raise awareness of the LHS in your organization
- Secure executive advocacy
- Coordinate your organization formally endorsing the LHS Core Values
- Make a financial contribution to the Learning Health Community
- Host a Learning Health System meeting at your HQ

How can pharma help create the Learning Health System? continued

2. Help plan and build:

- Identify others in your organization who are interested; build a coalition in your organization to help progress the Learning Health System
- Dedicate staff capacity to engage and contribute to Learning Health System initiatives, projects, task forces
- Coordinate experts at your organization reviewing and commenting on the stakeholder tables (what needs to change so your organization can engage in the LHS?)
- Coordinate experts at your organization reviewing and commenting on the LHS value proposition

How can pharma help create the Learning Health System? continued

3. Spread the word – inside and out:

- Spread the word when your company endorses the LHS Core Values
- Share key LHS articles and white papers, etc. internally
- Present internally on the LHS
- Connect other initiatives you are involved in to the LHS
- Post about the LHS on your organization's social media sites
- Publish in [Learning Health Systems](#)

How can pharma help create the Learning Health System?

continued

4. Learn and prepare:

- Attend LHS meetings
- Stay on top of published articles, books, and white papers on the LHS
- Inform your organization's strategies, initiatives and projects (LHS as future context)
- Prepare your organization for an operational Learning Health System

Watch out: systems thinking may have its own effect...
you may begin to form your own rapid learning loops internally

Preparing your pharma co for the Learning Health System

INITIATIVES	TIMEFRAMES	OBSTACLES / CHALLENGES	INFLUENCING FACTORS	DEPENDENCIES	PREREQUISITES	TECHNOLOGIES	REGULATIONS	FUNDING
<ul style="list-style-type: none"> Adapt internal policies regarding sharing data and evidence 	<ul style="list-style-type: none"> 3 years total – 1 year for adoption 	<ul style="list-style-type: none"> Consensus around regulatory and communication regarding internal policies 	<ul style="list-style-type: none"> Pharma executives agreement 	<ul style="list-style-type: none"> Establish priority with Quality and Compliance organizations Agreed standards to ensure a consistent level of quality of RWE is shared or when RWE is shared, the limitations are clearly shown 	<ul style="list-style-type: none"> Updated/clarified regulations on pharma communication of data, info, and evidence in LHS 	<ul style="list-style-type: none"> Minimal 	<ul style="list-style-type: none"> 	<ul style="list-style-type: none"> Internal to company
