I have been a micromounter and micromount collector for more than 50 years.

In 2007 I retired and was finally able to go field collecting for more than a weekend at a time.

I met Bob Stevens at a CMMA symposium and he invited me to go to the Arkansas quarries with Dr. Henry Barwood and some others that Fall. It was the first of several trips I made.

We collected at five different quarries, some are more productive than others. Most of the specimens featured in my presentation were collected by me.

My emphasis is not on being comprehensive, but on showing some of the more interesting and/or aesthetic specimens I have collected.
