Costa Rica Leatherback Turtle Volunteer Vacation
Welcome Letter

Welcome to the SEE Turtles Costa Rica Leatherback Turtle Volunteer Vacation! On this unique vacation, you will spend four nights with researchers studying giant leatherback sea turtles, visit a unique butterfly farm, and more. By joining this trip, you will be directly supporting community-based conservation of these turtles by providing alternative income to poaching and generating funds to expand their efforts.

We started SEE Turtles in 2008 to encourage travelers to visit turtle conservation projects where their visit will make a difference in efforts to protect these endangered creatures and this has been our most popular tour. With the help of travelers like you, we have generated more than $1 million for turtle conservation and local communities and have helped to save more than 1 million baby turtles at important nesting beaches.

Please join us on this action-packed volunteer trip. We will meet and interact with the dedicated people working to protect their natural resources and learn much about the biology and threats facing Costa Rica’s wildlife.

We hope to SEE you in Costa Rica!

Brad Nahill

The leatherback is one of nature's truly unique creatures. Their immense size boggles the mind; these turtles can average more than 6 feet long and 800 lbs. But that's not the only thing that makes them unique. Their softer shell allows them to dive deeper than any other sea turtle and their size and dark color allows them to inhabit cold waters. The leatherback has had an impressive recovery over the past decade but human activities like consumption of their eggs and getting caught in fishing gear continue to threaten these extraordinary reptiles.

Spend 4 nights working with giant leatherback turtles at a turtle research station along the northern Caribbean coast. Walk the nesting beach at night with local researchers and relax and explore the rainforest during the day. The turtle work includes helping to measure the turtles, collect the eggs and move them to hatcheries, and working with hatchlings (late May - July).

Notes:
- Private dates available for groups of 2 or more from March - June.
- Minimum recommended age is 8 years old, under 18 needs to be accompanied by an adult.
- Group size is limited to 12 people maximum.

Is This Trip Right For Me?
Costa Rica is a safe and beautiful country that receives more than 1 million international tourists annually. This trip goes off the beaten path for 4 nights at the rustic and remote Las Tortugas Research Station (see accommodations for additional information). This is an active trip that requires a level of physical fitness and an ability to manage sometimes challenging conditions including weather and heat, bugs, and a schedule that can affect sleeping patterns.

2020 Dates:
- May 17 - 23
- June 14 - 20
- Private dates from March- June

Price: $1,595 pp

Private trip cost depends on total number of people signed up for each date.

- 2-3 people: $1,995 pp
- 4-5 people: $1,795 pp
- 6+: $1,595 pp

Discounts:
- $50 discount for paying by check
- Discount available for private groups of 8 or more

Includes:
In-country transport, meals, lodging, activities, guides, and a donation to turtle conservation.

Excludes:
Airfare to Costa Rica, personal items, airport exit tax, and tips for the guide and driver.
DAY 1 - ARRIVE TO COSTA RICA
Start your leatherback adventure by arriving to San Jose International Airport (SJO) anytime on the first scheduled day. Our guides pick you up from the airport and take you to Rosa del Paseo, a comfortable hotel in downtown San Jose. Get a good night’s sleep tonight, as the adventure starts early the next day. (Dinner the first night is not included)

DAY 2 - LEATHERBACK RESEARCH
Today you will head out to the Caribbean coast to stay at a remote research station in the rainforest. First, wake up with a delicious Costa Rica breakfast buffet of eggs, gallo pinto (their famous breakfast rice and beans), fresh tropical fruit, delicious coffee, and more. After breakfast, board the private bus for a 4 hour ride to the Caribbean coast. You’ll pass through the country’s largest national park and then descend to the Caribbean lowlands. The bus will drop your group at a small dock along the Tortuguero canals, where a boat will meet you to take you to the research station. The short boat ride passes through rainforest, so keep your eyes out for monkeys, sloths, toucans, and more along the way. Once you arrive, settle into your cabin and later, the researchers will give a presentation on sea turtles and the more than a decade of work that has gone into protecting this nesting beach. After dinner, you will head out for your first night of patrolling, accompanied by researchers who will guide you along the beach, spot the turtles, and help with the data collection. (B, L, D)

Please note: The station is fairly remote and isolated. The rooms are very basic and volunteers are expected to participate in cleaning up dishes after meals. The station has limited electricity, no hot water, and no internet. Bathrooms are basic and semi-private (shared between two rooms). Meals are simple and often include a meat like chicken or beef along with rice and beans, cabbage salad, and plantains. The station is in the rainforest, which can mean insects in the rooms (mosquito nets are provided).
DAYS 3 - 5: TURTLE RESEARCH
For the next three nights, you will spend four hours each night walking the nesting beach in search of the giant leatherbacks. Years of hard work protecting these turtles has resulted in increases in nests in the Caribbean and the leatherback was downlisted from critically endangered to vulnerable in 2013. But despite this success, their numbers are still declining and protecting their nesting beaches is vital to their long-term survival.

The first thing you notice when a leatherback is nesting is their giant tracks, which look like a monster truck has driven up the beach. Tasks involved in the research include measuring the turtles' length and width (no small task with a giant turtle!), moving the eggs to a hatchery (where they are protected until hatching), and observing the condition of the turtles, looking for scars or injuries.

From mid-May to June, you will have a chance to work with hatchlings, helping to do some basic research (measuring and weighing) and releasing them to the water. Green turtles also occasionally nest late in the season.

During the day, there is plenty of downtime to catch up on sleep, read a book, or walk along the beach. We do not recommend swimming at this beach however, due to strong ocean currents that can be dangerous. Planned daytime activities include a boat ride on the rainforest canals to look for wildlife including birds, sloths, monkeys, & caiman and a beach cleanup activity (even remote beaches have trash wash ashore). (B, L, D)

DAY 6 - CENTRAL VALLEY
This morning after breakfast, you will catch the boat back to meet your bus. Along the way back to San Jose, you will visit Jardin Pierella, a unique butterfly farm, to learn about these fascinating insects and other wildlife. You will see hundreds of butterflies, poison dart frogs, giant walking sticks, and likely sloths and other wildlife. The wonderful family who runs this farm will prepare a delicious traditional lunch. After a final group dinner on the town, head to bed early to be awake in time to go to the airport for your flight the next day. Overnight at Rosa del Paseo. (B, L, D)

DAY 7 - DEPARTURE
Return home with a new appreciation for the hard work of conservation and to share your experiences. You will be taken to the airport in plenty of time to catch your flight.
Between March and June, volunteers and researchers patrol the beach from 8:00 pm to 4:00 am in 4 hour shifts (8pm to midnight and midnight to 4 am) and in different sectors. It takes at least 4 hours to patrol the beach effectively and if a nesting turtle is found, the eggs are collected and relocated into a hatchery, where a new nest is dug and the eggs are watched until hatching.

A team of biologists and researchers trained in conservation techniques carry out the important work and are also responsible for guarding the nests at the hatchery and releasing baby turtles. Volunteers help with tasks including measuring length and width of the turtles, recording information on data sheets (see photo below), holding the bag that collects the eggs, and other tasks. Participants may be asked to help with beach clean-up activities as well.

Night Patrols
A group of volunteers, led by an experienced patrol leader, walks one of the sectors of the 4 km long beach searching for nesting females. Once a turtle is encountered on a night patrol, the volunteers work directly with it, taking carapace and nest dimension measurements, placing tags on their flippers, collecting eggs, moving them to the hatchery, and recording the data. The collected eggs will be relocated on the beach or taken to the hatchery where the volunteers on shift will build a new nest (according to measurements that were taken) and rebury the eggs. The number of eggs, nest location and turtle identification information (tag number) are then recorded by the hatchery attendant for further data analysis, for example hatchling survival rate.

Hatchlings
If hatchlings are encountered they are counted and released in the evening to an appropriate location along the high tide line and observed until they reach the sea. Some hatchlings will also be selected for data collection including length and weight. Hatchlings that emerge during the day are held until evening to be released under cover of darkness.
Leatherback Sea Turtles
The largest of all sea turtles, and one of the largest reptiles on earth, the leatherback turtle ranges in size from 4-8 feet in length (1.2 - 2.4 meters) and weighs between 500-2,000 pounds (225 - 900 kg). The average adult measures in between 5-6 feet (1.5 - 1.8 m) and weighs 600-800 pounds (270 - 360 kg).

The oldest of all sea turtle species, it has been around for more than 150 million years! They survived the extinction of the dinosaurs and thrived until the last several decades when human interactions have taken a major toll. Leatherbacks are considered vulnerable according to the IUCN Red List, upgraded in 2013 from critically endangered due in large part to efforts around the Caribbean to protect important nesting beaches.

At Estacion Las Tortugas, the leatherbacks nest starting in early March through the end of June/early July with a peak from mid-April to early May. Hatchlings start arriving mid to late May and peak in mid June.

Learn more about leatherback turtles on our website.

Green Sea Turtles
The green turtle is the second largest after the leatherback. They can weigh up to 500 lbs (225 kg) and reach four feet (1.2 m) in length. The adult is an herbivore, dining on sea grasses, seaweeds, algae and other forms of marine plant life. Their beak is sharp and finely serrated, perfectly adapted for grazing in seagrass beds and scraping algae off of hard surfaces.

This species can be found in the sub-tropics and tropics worldwide, with major nesting beaches in Tortuguero (Costa Rica), Oman, Florida, and Raine Island (Australia) where thousands of turtles nest each night during peak nesting season. They are also found nesting on French Frigate Shoals in the Northwestern Hawaiian Islands, Guam, American Samoa, Suriname, Georgia, South Carolina, North Carolina, Puerto Rico, and the US Virgin Islands.

At Pacuare, green turtles start nesting in early July through October.

Learn more about green turtles on our website.

Photo by Hal Brindley
La Rosa del Paseo
Located in downtown San Jose on Paseo Colon, La Rosa del Paseo is a charming small hotel that is close to many city landmarks. The hotel is part of Costa Rica's Certification for Sustainable Tourism for its standards of reducing energy and waste.

Las Tortugas Research Station
In 2000 Stanley Rodriguez, founded Estación Las Tortugas (The Turtle Station) in an effort to help save the population of sea turtles that visited Mondonguillo beach. This beach lies between the Mondonguillo Lagoon in the north, bordering with the Pacuare Nature Reserve, and the Urpiano Lagoon in the south, bordering with the Urpiano Lagoon Turtle Project. The beach protected consists of three kilometres of land, and the station is located about 25 kilometers (as the crow flies) north of Limon, on the Caribbean Coast of Costa Rica.

The area where the actual station is situated today used to be a coconut plantation and the beach was a poacher hideout where all the turtles visiting the area were poached for either their eggs, their meat, or their shell. The poaching rate throughout the years has diminished quite drastically after initiating the protection of the beach and from 100% of poaching to begin with, it has fallen to less than 5%. This beach was and continues to be mainly a leatherback turtle nesting beach, but green and hawksbill turtles also nest in small numbers each year.

Las Tortugas includes a small educational center with displays and samples of sea turtles, as well as paths through the forest and many species of plants. Regular wild visitors include howler monkeys, sloths, blue morpho butterflies, toucans, and many other species of birds.

Photos by Hal Brindley
Turtle Questions

Am I guaranteed to see a sea turtle or hatchling?
As with most wild animals, there is never a guarantee to see a sea turtle (they are endangered of course). However, if you plan to go during the peak of the leatherback nesting season (mid-April to mid-May), you have a very good chance of seeing multiple turtles. There are fewer nesting turtles early in the season (early March) and late in the season (mid-June to July). Hatchlings start arriving in mid-May and from early June through July, you have a very good chance of seeing hatchlings.

Is walking on the beach at night safe in Costa Rica?
In most places, yes. However, there are turtle nesting beaches that are also used to bring drugs into the country that are not safe. We do not take people to any unsafe beaches and have never had a safety concern on any of our tours. You will be walking with local researchers and guides who know how to handle any situations that might arise.

How does this trip benefit turtle conservation?
SEE Turtles runs sea turtle trips as a way to help save these incredible animals. To participate in the work and stay at the research station, we pay a fee to the local partner which helps to cover the costs of the conservation and research efforts. In addition, the volunteer help provided by travelers helps to ensure that the beach is patrolled (no volunteers means the beach is open to poachers to take every nest). Finally, every tour saves at least 200 hatchlings through a donation to the local conservation organization through our Billion Baby Turtles initiative.

Will I get to do every volunteer job on the trip?
As we can’t guarantee that you will see a sea turtle, we also can’t guarantee you’ll get to do every job in the volunteer program. We hope to give every participant the opportunity to do each job but it depends on the number of participants, the number of turtles encountered, and the individual circumstances with each turtle (sometimes more complicated situations require the researchers to do specific jobs). Generally the tagging is done only by research staff. If there is one specific job you really want to do, let your guide know and he will do his best to accommodate your request. Check out the page Turtle Research Information for details about the tasks involved in sea turtle research.
Logistical/Travel Issues

How much money should I bring?
We recommend that each participant bring $250 in cash for tipping and spending money. U.S. bills of $20 and less are widely accepted in Costa Rica (with change given in dollars or Costa Rican colones). Many shop owners are wary of accepting torn or “old looking” bills – so please bring crisp newer bills if possible! Small bills ($1’s and $5’s) are useful at the turtle projects where there are no banks and people have a harder time finding change for larger bills.

How much should I tip?
Tipping guides isn’t mandatory, but it is customary. We recommend tipping $8 to $10 dollars per day per participant to divide between your guide(s) and driver. (That would be $70 to $100 per participant depending on the length of the trip). Participants will not need to tip anyone else along the way but feel free to leave additional tips if you have great service at restaurants or the station if you like.

Can I go to an ATM in Costa Rica?
Although there are ATMs in Costa Rica, much of the time you will be in places where they are not available. In places where they do have ATMs, they don’t always work, so while you may be able to get cash from ATMs, don’t count on it. Your best bet is to do that while in San Jose before heading to the station.

How should I handle medications I need to bring?
If you plan to bring personal medicine, please consider the following:
• Carry just the necessary quantity, which is the quantity normally used by a person having your health problem.
• Bring a prescription or a written statement from your doctor, specifying that the medicine is being used under his/her control and that you need it for your physical health.
• Have the medicines labeled or properly identified.

Can I call home or check my email while in Costa Rica?
Calling home from Costa Rica can be expensive. For email, you should not rely on or expect to be able to get online while on the trip other than in San Jose. Cell phones from the US or Canada often do not work in Costa Rica or automatically switch you to a local service which activates international roaming fees. If you plan to bring a cell phone, please check with your provider about coverage and cost.

What is the weather like on Costa Rica’s Caribbean coast?
On the Caribbean, there are no defined wet or dry seasons like the Pacific coast. Generally it’s pretty hot (80’s to 90’s F) and humid.

Can I Photograph the Turtles?
Nesting turtles are sensitive to white light (including camera flash). To prevent disturbance, conservation organizations prohibit photographs at night (even with infrared). If there are hatchlings during the daytime, those can be photographed.

Are the electrical outlets the same?
The voltage in Costa Rica is the same as the states. However, most outlets are 2 prong instead of 3 prong, so if you are bringing something that needs 3 prongs you need to bring an adapter. Electricity at this station is generated by solar power, so there is not enough power to charge electronics.
SEE Turtles strives to reduce the environmental impact of our trips wherever possible. Sometimes we need help from you, the traveler, so here are some ways that we (and you) can help.

**Tortoiseshell Jewelry**
Did you know that tortoiseshell is actually hawksbill sea turtle shell? This is a major threat to hawksbills, which are critically endangered. Souvenirs made from their shells include bracelets, earrings, guitar picks, and combs. Below is a photo to recognizing these items and we encourage our travelers not only to not purchase these items but also to refuse to purchase from stores that offer them and to alert your guide when you see these items for sale. Learn more at TooRareToWear.org.

**Reducing Plastic Use**
Another major threat to sea turtles is plastic in the ocean, which can be confused for jellyfish. SEE Turtles is a member of “Travelers Against Plastic,” an organization that reduces plastic waste created on vacation. We encourage travelers to bring reusable water bottles to refill; you can go through as many as 15-20 bottles on one trip per person. Another suggestion is “skip the straw” with your drinks. Souvenirs can be stored in day packs instead of disposable plastic bags.

**Reef-Friendly Sunscreen**
Did you know that sunscreen can damage coral reefs? The ingredient “oxybenzone” has been found to cause harm in even very small quantities and an estimated 4,000 - 6,000 tons per year. Look for sunscreen without this ingredient (zinc oxide or titanium oxide are both safe), or wear a shirt while swimming to reduce the need for sunscreen.

**Reducing Carbon Emissions**
Travel by its nature is very carbon-intensive. Some ways you can reduce your emissions include leaving electronic devices at home, using fans instead of AC, by turning off AC, fans, and lights when not at hotels or cabins, and by using public transportation when possible. For sites with limited electricity, you can purchase a solar powered charger to recharge small electronics. You can also purchase carbon offsets. One we recommend is “Seagrass Grow” a program with our former organization The Ocean Foundation. The offsets are used to restore important seagrass beds, which are important habitat for green sea turtles.

---

**HOW TO IDENTIFY & AVOID HAWKSBILL TURTLE SHELL**
Endangered hawksbill turtles are hunted for their shells to make souvenirs. Help save this turtle by avoiding vendors selling tortoiseshell products.

Testimonials

Read some of the feedback we’ve had from our past Costa Rica trips:

My trip to Costa Rica with SEE Turtles was a well-run, thrilling, and meaningful experience! I’ll never forget the experience of releasing loggerhead hatchlings into the ocean, watching a mother sea turtle attempt to lay eggs on the beach, or the wonderful group of guides and volunteers who dedicate themselves to this effort, who I was proud to be a part of for a week. A well-run and unforgettable trip! For any one who is looking to make a difference in environmental conservation, explore a new culture, and/ or go on an adventure in the process, then this trip is for you.

-Noelle R.

The trip was amazing and couldn’t have asked for more!! Jose (our guide) was such a great guy and made the experience. The marine guides at the station were all wonderful and educated us greatly on the Leatherback species. All the guests on the trip became life long friends. The highlight of the trip was seeing these incredible species in person. Will keep this experience with me for life!

-Austin C.

This trip more than exceeded my expectations! Our guide was extremely knowledgeable regarding all aspects of the Costa Rica ecosystems and culture. He continually educated and entertained us. My 11 year old son did not even miss his video games once while we were at the station and completely “unplugged”. Our driver was kind and always safe. Both the guide and driver were so very excellent with my son through the trip. The researchers and staff were grateful to have our presence, and patient in answering all our questions. They went out of their way to ensure we saw a turtle and were involved with the hatchlings. The experience fostered an environment that lead to a close knit group with all of us on the tour. We were all sad when it had to end. I could not recommend this experience enough!

-Anonymous

Conservation is an extremely important thing. Likewise, the websites that teach us about conservation and give us the opportunity to help put conservation to work are just as important. SEE Turtles is an absolutely great and reliable organization that truly cares.

-Anonymous
Travel Insurance...

That Saves Baby Turtles!

SEE Turtles requires that all travelers obtain travel insurance to participate in our trips. You can choose any company but we recommend and partner with World Nomads, a socially responsible travel insurance company that has a great record of customer service (we have used it ourselves). When you use World Nomads insurance, they will donate 10% of the cost of the policy to help save baby sea turtles through our Billion Baby Turtles program. Through their Footprints Network, they have helped to save more than 20,000 baby turtles in Cuba, El Salvador, Panama, and elsewhere!

World Nomads covers a wide range of activities and helps with trip cancellation, lost baggage, medical bills, theft, and more. No matter whether you travel with us, another operator, or on your own, this insurance will have you covered and have a real impact on conservation efforts. Click here to get a fast free quote for a policy for your next trip.

Recommended Packing List

Pack in a duffel bag/suitcase/backpack that you can carry yourself and a day pack (If you have a suitcase with wheels, please realize there may be times when you will need to carry it short distances - wheels don't work well in sand, gravel or mud). * Indicates required items.

Clothing
- Sturdy sneakers or lightweight hiking boots
- Close-toed sandals for beach walks*
- 3-4 Pairs socks
- 2 Pairs of dark colored lightweight pants (nylon is better than cotton)*
- 2 Pairs of long sleeve dark colored lightweight shirts*
- 3-4 Pairs of shorts
- 5-6 T-shirts or short sleeve shirts
- Lightweight jacket
- Rain gear or poncho (dark color for turtle patrols)*
- Sun hat for the beach
- Underwear (lots)

Toiletries
- Comb/brush
- Shampoo/bath soap (ideally a biodegradable variety)
- Sunscreen 30+ (waterproof & reef-friendly)
- Insect repellent & after-bite stick
- Deodorant
- Toothpaste/toothbrush
- Washcloth
- Beach towel
- Hand Sanitizer (small bottle)
- Prescription medications (bring in carry on baggage)

Other Stuff
- Refillable bottle for water (clean water will be provided, we offer bottles at cost for clients)*
- Passport and a photocopy
- Money (recommend US $200-$250 clean bills for tips and souvenirs)
- Camera
- Binoculars (your guide may also have a pair)
- Games, cards, things to do during down time and on the bus
- Small flashlight or headlamp with extra batteries
- Large ziplock bags for wet clothes & shoes
- Ziplock bags for electronics (to keep dry and protect from humidity)
- Sunglasses
SEE Turtles was launched in 2008 as the world’s first effort to protect these species through ecotourism. Since then, we have expanded to include educational programs and our Billion Baby Turtles project. To date, we have brought more than 1,200 people to visit turtle projects, generated more than $1,000,000 for turtle conservation and local communities, saved more than 1,000,000 turtle hatchlings at more than 15 projects around Latin America, and reached more than 10,000 students with our educational programs. SEE Turtles is an independent 501c3 organization based in Oregon.

www.SEEturtles.org
brad@SEEturtles.org
(800) 215-0378, M-F, 9-5 PST
Terms & Conditions

Payment Policies:
Full payment of the total price of the expedition is due no later than 60 days (2 months) before departure. Travelers can choose to do monthly payments (the balance of the trip cost after deposit, divided evenly between the remaining months before the final payment is due) or pay 50% of the balance at 120 days before the trip with the remaining balance due 60 days before the trip. Monthly payment plans are unavailable within 4 months of trip departure. We reserve the right to cancel a reservation if payment is not made on time. In such cases, all payments are non-refundable.

Late Bookings: A late fee of $50 may apply to bookings received within 30 days of trip date.

Cancellation Policy:
If you cancel your space, it must be in writing and is effective the day we receive it in our office. Your cancellation will entitle you to a refund of any deposit or payment made to us, less a cancellation fee, according to the following schedule:

- 180 days or more prior to departure: $100.00
- 120 to 179 days prior to departure: $300.00
- 60 to 119 days prior to departure: 50% of expedition fee
- 59 days or less prior to departure: 100% of expedition fee

* Some costs are occasionally recoverable from the supplier.

Transfers:
Depending on availability, you may transfer from one trip to another four months prior to departure at no charge. If you transfer less than four months prior to departure, you may be subject to the cancellation fees. Registration fees paid may be transferred to another traveler up until 2 months before departure with prior notice provided. In some cases, transfers may be made less than 2 months before departure.

Cancelled Trips:
We reserve the right to cancel any trip prior to scheduled departure due to not meeting our minimum number required or logistical problems (vessel breakdown, strikes, etc.). You may transfer to another expedition or we will refund all payments made to SEE Turtles in full. In no event, however, shall our liability exceed the obligation to refund the amount you paid to us. Trip cancellation due to too few registrations normally occurs at a minimum of two months prior to departure. Refunds will not be given for individual hotel rooms, meals, sightseeing trips, or expedition arrangements for any reason. Expedition costs are quoted as a package; credits are not given for services not used.

Trip Cost Includes:
Accommodations, airport transfers as specified in the trip itinerary, excursions, entrance fees, local guides, most permits, and meals, unless otherwise indicated in the itinerary. SEE Turtles reserves the right to make any changes in the itinerary or to substitute hotels, modes of transport, or guides, for those mentioned in the literature if circumstances require it.

Trip Cost Does Not Include:
The cost of international air to the tour starting point (unless otherwise indicated in the itinerary) airport taxes, passport and visa fees, immunizations, insurance of any kind, alcoholic beverages, soft drinks, laundry, gratuities, excess baggage, items of a personal nature, medical costs, costs of hospitalization, additional expenses arising from the delay or extension of a trip due to weather, political disputes, illness, failure of transportation, or other causes beyond our control.

Children on Trips:
Some SEE Turtles trips are suitable for children, depending on the child’s age and experience. Anyone under age 18 must be accompanied by a parent or guardian. Please call before sending a trip deposit for anyone under 18 years of age.
Unexpected Trip Costs: We reserve the right to raise the trip fee if there are cost increases beyond our control. These cases are extremely rare and would only occur where unforeseen cost increases from suppliers would result in a financial loss for the organization. In these cases, registered clients are given the option to transfer or cancel with no penalties.

Transfers: Depending on availability, you may transfer from one trip to another four months prior to departure at no charge. If you transfer less than four months prior to departure, you may be subject to the cancellation fees. Registration fees paid may be transferred to another traveler up until 2 months before departure with prior notice provided. In some cases, transfers may be made less than 2 months before departure.

Travel Protection Policy: We require all participants to obtain individual travel insurance to protect yourself and your equipment. Travel insurance may reimburse you for non-refundable air and expedition costs should you need to cancel or interrupt your trip. The carrier can be any insurance provider but we can provide recommendations. Proof of insurance is required before participating on the trip.

Accommodations: Land accommodations are based on double occupancy unless otherwise indicated in the trip description. We can try to match single travelers of the same sex but some trips require a single supplement if single rooms are preferred to there is no match available.

Single Travelers: If you are a single traveler wishing to share accommodations, we will try to match you with a roommate. If no roommate becomes available, you may be required to pay the Single Supplement Fee listed in the trip description if applicable. If you request a single, private room you must pay the Single Supplement Fee listed in the trip description regardless of sign-up date. Please note that single accommodations are not always available.

Budget Airfare Caution: We recommend against buying non-refundable airline tickets until your trip departure has been confirmed (usually a minimum of 90 days before departure). Budget air tickets often carry restrictions and you risk penalties in the event of itinerary or date changes or trip cancellation. Please await confirmation of the trip before purchasing non-refundable airfare.

Withdrawal: SEE Turtles reserves the right to require any participant to withdraw from an expedition at any time if the expedition director deems his/her acts or conduct to be detrimental to or incompatible with the interest, harmony, comfort, or welfare of the expedition. In such cases, no refunds will be given.

Medical Issues: Although SEE Turtles trips are not generally very physically demanding, you must be in general good health to participate. It is the passengers' responsibility to judge the appropriateness of their physical capabilities to these travel activities. Anyone with medical problems or restrictions must make them known to us well in advance of the trip and should have a personal supply of any special medications they may need. The trip leader has the right to disqualify any member from the group at any time if considered medically necessary; no refund will be made under such circumstances. SEE Turtles and its affiliates take no responsibility for special arrangements required by passengers physically unable to complete a trip and assume no liability regarding provision of medical care or medical evacuation.

Release Forms: On some trips you may need to sign an additional tour operator release form by our local partners and/or tour operators.

Suppliers of Services: SEE Turtles is performing a non-profit service by informing potential participants of worthwhile expeditions. However, SEE Turtles is acting independently and has no business association as partner or joint venture with any boat owner, resort, hotel, carrier, SCUBA operation, or other services. Any claims for inadequate performance or non-performance of services may be made against the supplier of those services but shall not be made against SEE Turtles.

SCUBA Diving: SEE Turtles does not offer SCUBA diving as part of any of our trips. Participants may participate in diving while on a trip but acknowledges that SEE Turtles has no responsibility for the actions, performance, or equipment of any SCUBA services offered by hotels or dive shops. We recommend that any travelers planning to dive while on a SEE Turtles trip research the safety record of the operators and obtain additional divers insurance.
