

## WHITE MODEL

Due THURSDAY, April 5<sup>th</sup>

PROJECT grade

Should be in  $\frac{1}{4}''=1'$  scale.

Show me what your 3D world will look like with as much detail as you want to provide.

Take into account ALL aspects of the world and the space as it pertains to what the audience will see.

Mask your wings and backstage area... somehow. (whatever your group decides will be the specifics.)

Remember the examples that are in the class.

(Make this out of index cards, card stock, anything white that has stability.)

*USE your class time WISELY! You are passed the RESEARCH stage (or should be...) start building and crafting your worlds in class!*
