

Reimbursement Navigator

Streamline the reimbursement and prescribing process for your GenVisc®850 patients

Visit orthogenrx.aspnprograms.com to:

Obtain Prior Authorization forms for specific plans and initiate benefits investigation Have covered prescriptions routed to an in-network pharmacy or local pharmacy to be filled

Track GenVisc®850 prescriptions and get current status updates

IMPORTANT INFORMATION

Description

GenVisc 850 is a sterile, viscoelastic non-pyrogenic solution of purified, high molecular weight sodium hyaluronate (average of 850,000 daltons and a range of 620,000 - 1,170,000 daltons) having a pH of 6.8-7.8. Each 2.5 mL of GenVisc 850 contains 10mg/mL of sodium hyluronate dissolved in a physiological saline (1.0% solution). The sodium hyluronate is derived from bacterial fermentation. Sodium hyluronate is a poly-saccharide containing repeating disacchride units of glucuronic acid and N-acetylglucosamine.

Indications and Usage

GenVisc 850 is indicated for the treatment of pain in osteoarthritis (OA) of the knee in patients who have failed to respond adequately to conservative non-pharmacologic therapy and simple analgesics, e.g., acetaminophen.

Directions for Use

GenVisc 850 is administered by intra-articular injection. A treatment cycle consists of five injections given at weekly intervals. Some patients may experience benefit with three injections given at weekly intervals. Injection of subcutaneous lidocaine or similar local anesthetic may be recommended prior to injection of GenVisc 850.

3 steps to prescribe GenVisc®850 in your provider portal

OrthogenRx Reimbursement Navigator support services for patients and prescribers include benefit investigations, prior authorization support and other financial assistance. Once completed, your referral will be submitted to ASPN to determine coverage for your patients.

- Track active referral status from script to delivery
- View patient enrollment status and upload supporting documents
- Manage multiple prescribers in a single account

STEP

Enter patient name and contact information. Indicate GenVisc®850 dosage, number of syringes, and diagnosis.

STEP

Enter pharmacy or medical insurance, complete the prior authorization, and upload relevant documents. The appropriate prior authorization form is pre-populated with patient information for quicker processing.

STEP

Review all selections and proceed by creating a product referral.
