

GILDED & PAINTED

# WINDOW CARE

## INSTRUCTIONS

DO use a moist paper towel or soft cloth to wipe (Windex or any commercial window cleaner is fine).

DO take measures to prevent condensation from accumulating and staying on the interior surface of the glass.

DON'T use squeegees or anything abrasive to wipe.

DON'T allow bumping or scratching of the interior surface.

## VARNISH

If we've applied varnish for you and it begins to chip, give us a call. It's better to have us re-varnish than to wait and require a re-gild or re-paint.
