Interpreting the chart:

- The size of the bubble indicates the size of employment (number of jobs).
- The horizontal axis indicates the compound annual growth rate, or employment change, over the study period. Growth to the right on the graph is positive.
- The vertical axis indicates the concentration of the industry in the region relative to the state. A concentration of 1.0 or higher indicates that the industry is more concentrated in the region than in the state.
- Industries in the right, upper quadrant showed growth over the last five years and a higher concentration in the region compared to California. An employment concentration higher than 1.0 indicates a region's competitive advantage and an area of specialized economic activity compared to the state. Regional industries that showed an employment concentration of 1.25 or higher are considered heavily concentrated compared to California. The following industries are regarded as heavily concentrated in Siskiyou County: Mining and Logging (3.01), Educational and Health Services (2.61), Government (2.11), Farm (2.09) and Manufacturing (1.25).
- The three industry sectors that saw the strongest employment growth were Other Services (55%), Leisure and Hospitality (18%) and Farm (14%).
