- **Notes:** Made up of artists and works concerned with the art world, EFA's latest exhibition has already received some rave reviews. We're particularly interested in Eric Doeringer and William Powhida, but all of the twenty artists exhibiting are worth a look. More importantly, this is a show that needed to exist; this sort of institutional critique is a prominent trend in New York right now, and it needed exactly this sort of critical attention and curatorial structuring. You might catch yourself talking about this show for a while.
