

Leg Drawing Worksheets

by JeyRam

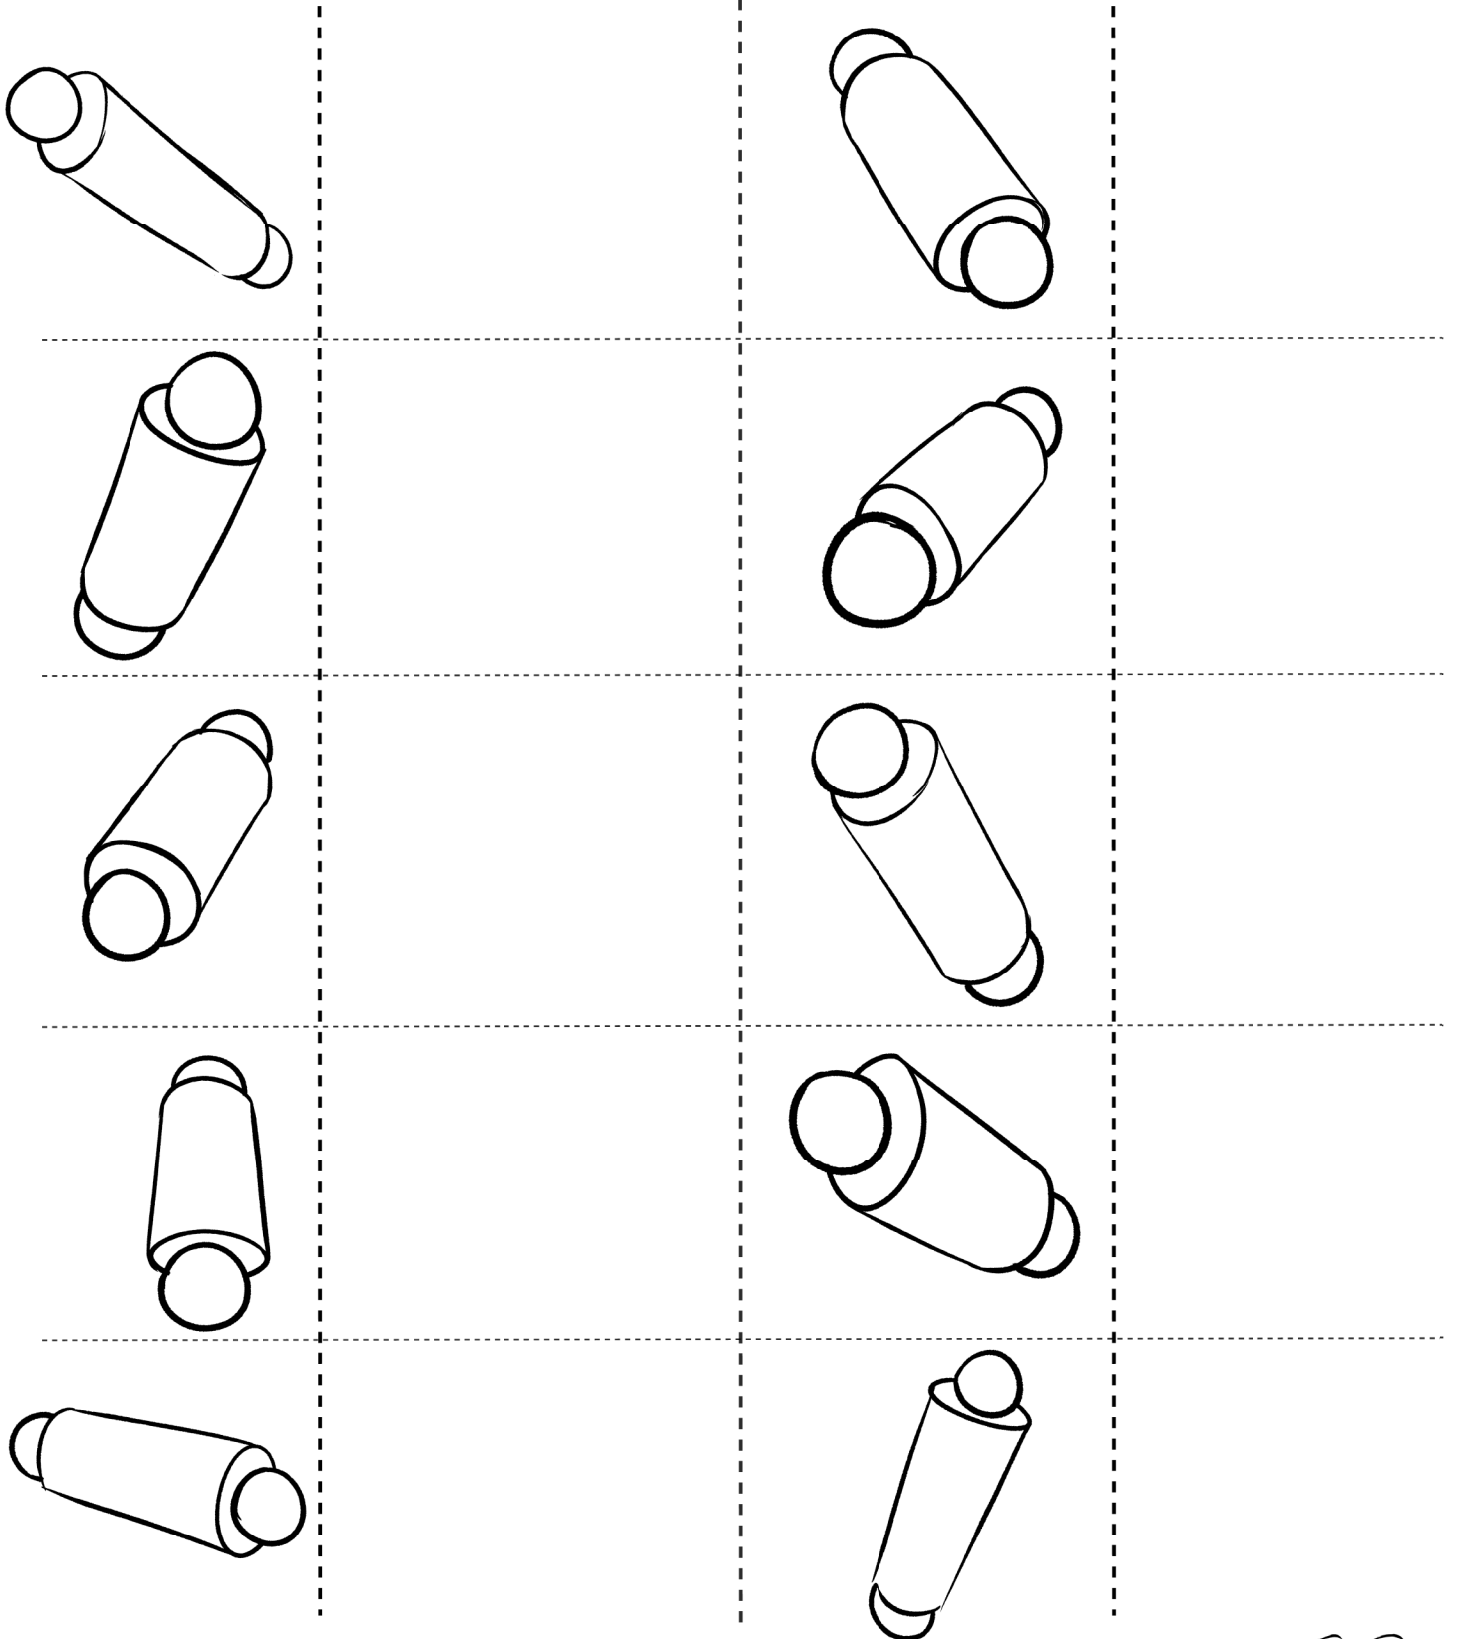

The main form that we will be using when drawing the limbs of the body are cylinders, so let's get comfortable with drawing them. Copy from the examples and don't be shy about erasing.

Leg Drawing Worksheets

by JeyRam

Now let's add in some spheres that will be used to represent the joints of the legs.
Copy from the examples and draw some of these in your sketchbook once you complete this page.
Drawing from memory will help you better retain what you learn.

Leg Drawing Worksheets

by JeyRam

To take us a step closer to drawing the actual legs, let's draw some simplified legs made of two cylinders and two spheres. Take note that the cylinders will be slightly tapered towards the bottom.

Copy from the examples below and don't be shy about using an eraser!
