

Industrial Designer sought by Pressure Profile Systems, Inc. in Los Angeles, CA.

Duties: Work in close partnership with engineering, marketing, production, and sales departments to establish and evaluate design concepts for new products. Draft sketches and illustrations of potential products and working to enhance existing products to make them more appealing to our customer base. Use blueprints, detailed drawings, and computer-aided designs to help demonstrate product potential both internally and externally. Fabricate and revise models using samples in according to client specifications. Research design trends and product limitations, as well as appearance, safety, functionality, serviceability, budget, production costs/methods, and market characteristics, for each new product. Test new designs in focus groups or surveys. Work on package design, improve industrial machinery, develop industrial standards and regulatory guidelines, develop manufacturing protocol, provide direction to company drafters, create machine-readable instructions for further clarification, and create trademarks to appear on advertising materials or other company marketing collateral. Present designs to clients for approval and help advance brand positioning by attending trade shows and exhibitions, and working with production facilities to supervise manufacturers' efforts. Participate in specialist and multidisciplinary team meetings.

Requirements: Bachelor's degree or equivalent in Product Design, Industrial Design, Mechanical Engineering, or related field, plus one (1) year of industrial design, commercial design, product design, mechanical engineering, or related experience designing specialty devices for use in automotive, robotics, or similar applications; branding, CMF (color, material, finish) design; preparing product sketches, blueprints, computer-aided designs, and 3D modeling; researching design trends, product safety, function, materials, and production costs; and utilizing SolidWorks, Photoshop, and Illustrator software.

Send resume to: Steven Sanchez, Administrative Manager, Pressure Profile Systems, Inc., 5757 Century Blvd., Suite. 600, Los Angeles, CA 90045 or fax (310) 507-0229.
