I am a 21 year old Communication Designer. I am also the creative lead for a page called Geeks of Color. My passion lies in superheroes, science fiction, space, music, and design. I love to create, especially when I get to combine all my passions together and create something new out of it.

As a designer, I believe that design should always follow the rule of 'form follows function'. For me, design is not only decoration. I also like thinking outside of the box while working from inside of it. As Albert Einstein would say: "Combinatory play seems to be the essential feature in productive thought."
