The lessons are organized with activities that include a broad range of fun games and drills that will demand the involvement of all parts of the player's body. During the lesson there is also time reserved to play a small game of Futsal.

Some of the motor skills that the `Footy Mites` focus on are: running and jumping around obstacles, alternate feet activities, catching and throwing activities, running stopping and turning, skipping and hopping, futsal specifics: such as receiving, shooting, passing and dribbling the ball. Some of the Social & Emotional Focus are: following directions, recognition of limits, to understand other people's moods and feelings, to cooperate and share, the importance of friendship and the experience of having fun while playing Futsal.

FutsalRVA strives to provide the highest value for Academy players and families. For convenience, fees are inclusive of all year-round training, program and administrative costs.

FutsalRVA is committed to maintaining its independence and objectivity in the formation of our Academy teams. We are NOT a club and have no soccer club affiliation. Although we utilize the support and cooperation of soccer coaches from many neighboring soccer programs, we have a strict “no recruiting policy”. Soccer players from one club can rest assured that they will never be pressured to join other clubs in the course of playing futsal with our program. In addition, our independence and objectivity are reflected in the fact that we provide equal, unbiased opportunity for all players in our `open I.D process`.
