Hey kids, we are going on a journey through time. It’s over 100 years since aeroplanes were invented.

Q1: What was the name of the very first aeroplane?

Q2: What medal was Major Hawker given?

Look Alfie!
It’s another aeroplane?

Wow! That is a Bristol Scout. They were made here during World War One.

Where are we Alfie?
I don’t know, but what is that strange aeroplane?

Let’s go time-travelling!

1903

1916
Q1: What was the name of the very first aeroplane?

Hey Amelia, look! There is a lady climbing out of that aeroplane.

Q3: Where did Amy Johnson fly to?

1940

This is one of Bristol's secret factories.

Q4: Why were there secret factories?

Where are we? I think we are underground!

1955

How did we get here? Where are we going? Looks like we’re in a helicopter!

Q5: What can helicopters be used for?

Look in the sky Amelia! That aeroplane is hovering!

1958

Let's go inside.

Q6: What does Mary look after?

1965

Wow! Look at that rocket Amelia!

I wonder if any foxes have been to space?

Q7: How long was Valentina Tereshkova in space?

1990

Careful, it’s landing right in front of us.

Q8: What is Chuck’s aeroplane called?
Q9: What does Daddy Fox use to help fly his aeroplane?

Look Alfie, that looks like Daddy’s aeroplane.

Yes. We met loads of really cool people and learnt lots about flight. Can you show us how you fly a plane?

Hi you two. Did you enjoy your trip through time?

Yes of course!

Have you noticed how aeroplanes have changed so much over time?

As an aeroplane engineer, I am always looking for ways to make planes better. Maybe soon we won’t need pilots on board at all.

Are we going to see Concorde now?

Yes we are, let’s go!

Q10: How fast did Concorde fly?
