CHART 1 TARGET STRATEGY EXPOSURE

INVESTMENT OBJECTIVE

The investment objective of the Fund is to seek to achieve superior absolute and risk-adjusted returns as compared to balanced fund approaches, or a long-only equity fund, with the added benefits of protection and performance during sustained downward trends while earning a yield.

INVESTMENT STRATEGY

Auspice One Fund Trust ("One Fund") maintains traditional exposure while markets move higher yet always protecting capital, tactically adjusting to reduce inevitable corrections while maintaining the non-correlated opportunities at all times.

One Fund uses global futures contracts to efficiently generate the core protective exposures (commodities, interest rates, currencies, equity indices) while the remaining assets are invested in traditional equity and fixed income ETFs and/or mutual funds along with Gold (see Pie Chart 1).

RULES BASED AND INCOME ORIENTED

One Fund benefits from a rules-based active management core. It combines the long-term track record of Auspice with tactical active and passive income-oriented global growth equity and fixed income ETFs.
