The University of Michigan's College of Engineering will host the 1996 International Conference on Computer-Aided Medical Image Analysis (ICMA) at the Detroit Institute of Technology in Detroit, Michigan, from June 9 to 11. The conference, which will attract over 300 participants from academia, industry, and government, will focus on the latest developments in computer-aided medical image analysis.

ICMA will feature a variety of sessions, including tutorials, workshops, and poster presentations. The conference will also include a special session on medical image analysis and its applications in various fields such as radiology, pathology, and bioengineering.

In addition to the technical sessions, the conference will also include a series of keynote speeches by leading experts in the field. These speeches will cover a range of topics, including the latest advances in medical image analysis, the role of artificial intelligence in healthcare, and the ethical implications of using computer-aided medical image analysis in medical decision-making.

The conference will be held at the Detroit Institute of Technology, a world-class research institution with a strong reputation for excellence in the fields of engineering and technology. The institute's facilities provide a state-of-the-art environment for the conference, with modern classrooms, lecture halls, and laboratories.

ICMA will be co-located with the 1996 Conference on Computer Vision and Pattern Recognition, providing attendees with an opportunity to learn about the latest developments in computer vision and pattern recognition. The conference will also include a number of social events, including a welcome reception and a gala dinner, providing attendees with a chance to network and socialize with other conference attendees.

In summary, the 1996 International Conference on Computer-Aided Medical Image Analysis (ICMA) is a must-attend event for anyone interested in the latest developments in computer-aided medical image analysis. With its cutting-edge sessions, expert keynote speakers, and social events, ICMA is sure to be a memorable event for all attendees.
The Academic Year for the American Numismatic Society Annual Congress was held in New York City. The annual congress is sponsored by the American Numismatic Society and features sessions on a variety of topics related to numismatics. The conference is a great opportunity for numismatists to share their research, learn from others, and attend workshops and seminars. The 2019 conference was held from July 17-20 and featured a wide range of presentations and discussions.

The American Numismatic Society is a non-profit organization dedicated to the study and promotion of numismatics. The society was founded in 1857 and has a collection of over 200,000 coin-related objects. The society also publishes a variety of books and journals on numismatics.

For more information on the American Numismatic Society and their annual congress, please visit their website at www.americannumsociety.org.
museum's sites, monuments, and other places of interest.

On September 28, the exhibition opens at the Museum of Art in New York City.

On October 1, the exhibition moves to the Museum of Modern Art in Los Angeles.

On October 15, the exhibition begins in Sydney, Australia.

On November 1, the exhibition opens in Melbourne, Australia.

On November 15, the exhibition moves to the Art Institute of Chicago.

On December 1, the exhibition concludes in St. Louis, Missouri.
