New Publications from Fuel Cell and Hydrogen Energy Association Showcase Breadth and Range of Industry

(Washington, DC) – July 18, 2016 – The Fuel Cell and Hydrogen Energy Association (FCHEA), the leading trade association dedicated to the commercialization of fuel cells and hydrogen energy technologies, released two new resources that confirm the impact these technologies are making on today’s energy landscape. FCHEA members include fuel cell manufacturers, fuel providers, automakers, component suppliers, national laboratories and other organizations in and the U.S., Canada, UK, France, Germany, Sweden, South Africa and Japan.

The new FCHEA [*Member Product Guide*](#) highlights the range of commercially available products, covering the entire fuel cell and hydrogen supply chain – from components to complete fuel cell systems and fuel cell vehicles, as well as the hydrogen generation, delivery and storage technologies helping fuel them. The guide also features other services FCHEA members provide, including laboratory space, research and development, testing, certification, engineering, and more.

In addition, the [*Member and Media Guide*](#) provides a detailed overview of FCHEA’s members and includes media contact information for each organization.

Both publications are vital resources for journalists, government officials, energy experts, and customers interested in fuel cell and hydrogen technologies to see the scope of FCHEA members and the broad range of products available in the market today.

“FCHEA members truly represent the full spectrum of fuel cell and hydrogen technologies,” says FCHEA’s president, Morry Markowitz. “Through innovation, attention to the marketplace and the delivery of high-demand products, the fuel cell industry in the U.S. and around the world is fulfilling a wide range of energy needs. These new publications provide a helpful, easy-to-use, and impressive overview of our industry,” he added.

The new publications can be downloaded from FCHEA’s website at <http://www.fchea.org/media-kit>.
