Fuel Cell and Hydrogen Industry Growth Showcased in New FCHEA Publications

(Washington, DC) – May 22 2018 – The Fuel Cell and Hydrogen Energy Association (FCHEA) released two new resources today that demonstrate the growth and impact of the industry and showcase the leadership of FCHEA’s member companies. FCHEA represents the complete fuel cell and hydrogen value chain including fuel cell manufacturers, fuel providers, automakers, component suppliers, and other organizations in the United States and around the world.

The 2018 *Member Product Guide* and *Member Media Guide* are vital resources for analysts, journalists, government officials, energy experts, and customers interested in today’s fuel cell and hydrogen technologies.

“The fuel cell and hydrogen economy is here to stay, and growing rapidly,” said FCHEA President Morry Markowitz. “Through innovation, attention to the marketplace, and the delivery of high-demand products, the global fuel cell industry meets a wide-range of needs in both transportation and power generation today, and is poised to play an even greater role tomorrow,” he added. The new publications, which provide easy-to-use overviews of this dynamic industry, its products, and FCHEA’s member companies, are available for free download at <http://www.fchea.org/media-kit>.

The *Member Product Guide* details the wide-range of commercially-available products covering the fuel cell and hydrogen supply chain including: components, primary, back-up and distributed power systems, commercial motor vehicles, forklifts, hydrogen generation, delivery and storage technologies. Services, including laboratory space, research and development, testing, certification, engineering, are also covered.

The *Member Media Guide* provides a detailed overview of the FCHEA’s member organizations and includes media contact information.
