

Installing the **DOME**

BEFORE YOU START:

- Read these instructions and warning in full before proceeding.
- Remember, DOME is supplemental padding. Do not peel apart the layers of the DOME.
- DOME does not adhere directly to the inside of the cap; there is no adhesive.

TO OPTIMIZE FIT:

The DOME can be customized to the exact shape of your fabric cap. It is designed for a large to extra-large fabric cap, but can be trimmed to fit small and youth sizes:

1. Open your package and find the back tab of the DOME. The back tab does not have any semicircles towards the center.
2. Press the pad into the cap with the front tab positioned toward the bill of the cap.
3. Use a marker to mark parts of the DOME that go beyond the bottom of the cap.
4. Trim any overlapping or excess padding with sharp scissors.
5. Place DOME back into the cap and tuck the tabs under the caps lip if one is provided.

CARE INSTRUCTIONS:

- Remove from cap and hand wash with soap and lukewarm water.
- Do not submerge the DOME into water.
- Air dry.
