

These shapes make up the fish below.

Can you find the shapes in the fish below?

How many sides does each shape have?

How many of each shape can you find? Write the number inside the shape.

Susan: This form can be printed as a coloring sheet, where the teacher tells the child to color each shape in a specific color, and then color the fish. This same method can be used with the clay. Even with two colors, warm colors can be used for the round shapes, cool colors for the straight line shapes.
