

# **SAN JUAN MINING & RECLAMATION CONFERENCE**

## **Reconnect & Reboot – a Mine Reclamation Meetup**

Organized by the San Juan Mining & Reclamation Conference Committee  
**September 29-30, 2022 – Ouray, Colorado**

Join mining, reclamation and water science professionals, researchers, analysts, educators, policymakers, and regulators on September 29 to 30 in Ouray, Colorado to reconnect and reboot. This two-day Meetup is a unique opportunity for exploration and knowledge sharing that energize relationships and planning for projects and partnerships benefiting watersheds around the San Juan Mountains. As a change of pace from previous conferences, this Meetup will offer a low-key, casual event and field tours that emphasize networking and time to reconnect with experts, the mining industry and community partners. The event will have fewer presentations to enable the maximum amount of social interaction and relationship building.

Organized by the San Juan Mining & Reclamation Conference Committee, this Meetup is intended to build on the energy, ideas and connections formed during past conferences, as we take a year off from the larger event. Our aim is to advance the science and policy of legacy mine remediation and water quality as it relates to improving mining practices and addressing water quality impairments in our region. For more information, please visit <http://www.mountainstudies.org/sjmrc> for more information.

### **TENTATIVE SCHEDULE**

### **SPONSORSHIPS**

Organizations and industry representatives can increase visibility and support efforts to re-envision the future of reclamation through sponsorship! Sponsor support is critical to event success and allows the conference committee to create a visionary event that is affordable and accessible. Sponsors and exhibitors will receive valuable exposure to an audience of decision makers from Colorado and beyond.
