

**Table 1.2-1
Summary of Land Requirements for Project Pipeline Facilities**

Pipeline Facility	Land Affected during Construction (acres) ^a		Land Affected during Operations (acres) ^b	
	Within Existing Maintained/Operational Easement ^c	Outside Existing Maintained/Operational Easement ^c	Within Existing Maintained/Operational Easement ^c	Outside Existing Maintained/Operational Easement (New Permanent Impact) ^c
Contractor Pipe Storage Areas	TBD	TBD	TBD	TBD
Virginia Total	TBD	TBD	TBD	TBD
Pipeline Facilities Total	TBD	TBD	TBD	TBD

Notes:

^a All areas required for construction including areas that will be identified as operational right-of-way after Project completion.

^b Acreages are included within the reported acreage for “Land Affected During Construction.”

^c Refers to existing operational easement of existing Transco pipelines rights-of-way.

^d Temporary and permanent footprint required only if it is determined pipeline rights-of-way are not sufficient.

Key:

ATWS = Additional Temporary Workspace
CPL = Central Penn Line

Transco proposes to utilize the following rights-of-way during construction of the pipeline facilities:

- A 100-foot-wide construction ROW for installation of the 42-inch diameter greenfield CPL South pipeline;
- A 90-foot-wide construction ROW for installation of the 30-inch diameter greenfield CPL North pipeline; and a 90 foot-wide construction ROW for installation of the 36-inch diameter Grugan pipeline looping. Of this, Transco will utilize 30 feet of its existing Leidy Line rights-of-way during construction and is further requesting the use of an additional 60 feet of new construction workspace;
- A 100 foot-wide construction ROW for installation of the 42-inch diameter Unity pipeline looping. Of this, Transco will utilize 35 feet of its existing Leidy Line system easements during construction and is requesting the use of an additional 65 feet of new construction workspace; and
- Transco will utilize its existing Mainline system easements for the Mainline A and B replacements.
