

VISION AND MISSION

Northwest Community Health envisions communities where quality of life is enhanced by integrated systems of healthcare and emergency response. Our mission is to reduce the incidence and impact of injury, illness, and catastrophic events in our communities through superior coordinated clinical care, prevention programs, and education.

2020 STRATEGIC PRIORITIES

VALUE

Achieving high value for patients must become the overarching goal of health care delivery, with a focus on providing meaningful quality outcomes relative to program costs. The plan prioritizes delivering, measuring, and reporting health outcomes coupled with financial accountability and engagement at all levels of the organization.

ACCESS

Access to care is a major unmet need reflected in the Tomball Regional Health Foundation's 2017 Community Health Needs Assessment. The plan prioritizes improving access to care by establishing strategic partnerships to fill healthcare system gaps amenable to our areas of expertise.

CULTURE

Improving the culture of safety within health care is an essential component of preventing or reducing errors and improving overall health care quality. Designing a deliberate workplace culture and engaging employees to produce better outcomes is especially important to this process. The plan prioritizes enhancing the culture of the organization to establish a culture of patient safety and provider wellbeing.

EDUCATION

Education plays a vital role in improving community health and improving the efficacy of the healthcare system. The plan prioritizes the delivery of community and professional education programs.

EMERGENCY RESPONSE

Emergency response remains the core function of Northwest Community Health. The plan prioritizes the enhancement and development of the emergency response system to ensure adequate response to acute medical and trauma emergencies and disasters.
