Kindergarten Newsletter

By Ms. Shah and Ms. Fradelakis

Reading

Over the next two months in reader's workshop, our kindergarten readers will continue to work on building their independent reading stamina, their comprehension skills, and their word decoding skills. They will also engage in book talk with their partners about characters' feelings and emotions, and act out different parts of their books. Readers will also begin to use a new tool, Post Its to mark places in their books to remind themselves what they want to share with their partners!

Writing

Over the next two months in writer's workshop, our writers will be writing informational books where they will be teaching their audience all they know about a certain topic. They will focus on organization, elaboration, and revision. Students will continue writing across all pages, add more details and consider their reader's questions, and go back and revise or edit any parts they want to change or maker better.

Science and Social Studies

This spring, our scientists will begin to focus on the various life cycles of animals such as butterflies and frogs. They will delve deeper in the lives of various animals and consider how their characteristics help them survive.

For social studies, students will learn all about families and how families are different and alike. Students will also share photos, traditions, and important facts about their families. They will share their customs and beliefs and how to celebrate the differences in their family!

Upcoming Events

Spring Break-March 30th-April 8th

Memorial Day No School- May 28th

Studio in a School Celebration- Details to Follow

Math

Over the next two months, mathematicians will continue to focus on two digit numbers, 11-20. They will also compare numbers by using the vocabulary words, equal, less, and same. Next, they will dive into learning all about 2D shapes such as rectangles, circles, triangles, and squares. They will describe their attributes as well as what shapes they see in the classroom!
