DEPOSITORY SAFES

The International Fortress

Depository Safe is the centerpiece of daily cash management for retail stores, restaurants and any business environment where accumulating cash in the cash drawer is at risk for armed robbery or internal theft.

A most effective loss prevention practice is to transfer excess cash to temporary and secure storage through the workday. The Depository Safe acts as a convenient and secure way station between the cash

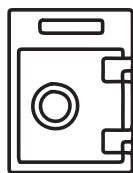

drawer and final disposition of daily receipts by bank deposit, armored car pickup, or transfer to a high security safe. The safe deters hold ups and internal theft. Cash Management safes are not recommended for overnight or unattended storage.

Despository Safes feature a mailbox type drop-down drawer for fast and easy deposit of cash and valuables into the safe without having to open it. Drops are made into a storage compartment through a one-way deposit system that secures the contents until authorized access is gained through the door.

Additional Features

- **Front-Loading Access**

Depositories open in the front instead of on top, allowing for under-counter placement of the safe.

- **Fish-Resistant**

Incorporates an anti-fish baffle to deter theft when attempting to “fish” the safe contents through the deposit drawer.

- **Auto Lock Feature**

The locking bolts automatically extend in the safe body, locking the door, when equipped with a digital lock.

- **Lock Protection**

All locks are protected by a drill-resistant hardplate.

- **Powder Coat Paint**

Prevents rust on the inside and outside of the safe.

Options

- Custom sizes and colors available
- Locking deposit drawers available
- Most models available in right swing door
- Biometric locks available
- Coin trays available
- Extra shelves available

Electronic digital pushbutton locks with operational features such as programmable combinations, multiple user interface, time delay, and auditing are available

and can be configured with electronic lock devices from leading manufacturers.
