

VALIDATOR

Data Erasure Process Verification

Ensure compliance with new data security standards using our quick and easy erasure verification tool

Current Data erasure standards now require a verification step utilizing an independent hardware/software tool to ensure the erasure process is successful.

The VALIDATOR is a single-purpose device designed to verify drive erasure in a simple PASS/FAIL process. Developed jointly by DestructData, Inc. and CPR Tools, the VALIDATOR is the result of a unique combination of data erasure and forensic analysis expertise.

Engineered with reliable solid state components, this innovative hand-held device is totally self-contained and requires minimal operator training.

The VALIDATOR is a key component of the DestructData Erasure Compliance & Audit Program (ECAP) (details on reverse side)

Features:

- Independently developed, verifies against all erasure software.
- Highly portable and lightweight.
- Minimal operator training required.
- Cannot write to connected drives.
- Solid state design.
- Self-contained - no PC required.

Compliance:

Verification of your erasure process by an independent tool is now required by the major standards:

- NIST SP 800-88
- R2
- e-Stewards
- NAID
- ADISA

Specifications:

- Compatible with PATA/SATA drives (all sizes using adapters)
- Process up to 4 drives at once without using expanders
- Supports verification of single-character overwrites and random-repeat overwrites
- Test for presence/absence of HPA and DCO
- Test for presence/absence of driver fingerprinting
- User-defined sampling rate from 10% to 100%
- Supports NIST sampling program
- Write block ensures device cannot write to drive
- Collects detailed reporting and auditing information for each drive
- Compatible with CPR Toolkit for advanced tools, reporting and management, connect using the USB port to PC
- Export results into major asset management programs

DestructData is the world's only full-scope data destruction solution-provider. We offer a full suite of customized data erasure platforms powered by any of the leading software brands, as well as a complete line of HDD shredders, degaussers and crushers.
