

# Mobile Erasure Labs

## Custom Onsite Erasure Systems

### Custom Engineered Hardware/Software Systems for On-Site, High Volume Scenarios

Massive direct attach capability

Expandability

Optional pull out loose drive trays (any protocol).

• 15-26U Labs available

• Integrated scanning and printing available

• Example configuration shown. Actual components will vary depending on required specifications.

One of a kind custom mobile data erasure labs deliver electronic data security directly to any data center, office environment or satellite location. DestructData's rolling turnkey hardware / software platforms handle large volumes of data erasure prior to removing end-of-life storage assets. Ideal for mobile data destruction service providers, as well as self-sufficient datacenters wishing to handle their own sanitization. DestructData's custom designed mobile solutions are the product of our experience developing multiple hardware platforms running the most powerful data erasure software options available in the marketplace today.

- Fully customizable platforms to erase any balance of drive protocols and storage platforms in massive volume
- Complete with integrated display, keyboard and trackpad
- Direct support for Fibre Channel, SCSI and SAS/SATA SANs allow for entire storage networks to be erased without removing hard drives.

#### More Rackmount Data Erasure Solutions from DestructData, Inc.

#### Turn-key, ultra-high volume hard drive erasure appliances:

- Loose drive support for SAS/SATA
- 8 to 108 bay models available
- Certified data erasure
- No use limitations and no per drive fees
- Accessories expand support to IDE 2.5" & 2.5", ZIP, USB etc.

#### Portable Data Erasure Solutions from DestructData, Inc.

#### PEEK

Turn-key, ultra-high volume hard drive erasure appliance

Portable, customizable, integrated, industrial-level solution erases disk arrays, or entire frames

#### CYPHER

Mid-to-High-Volume Erasure Appliance

Customizable portable erasure system for throughput on a limited budget.
