

MediaVise Hard Drive Crusher

Deploys more than twice the destructive force of any other crusher!

The MediaVise® is a high security desktop data destruction solution standing only 25" tall and 12" wide. When a computer hard drive is fed into the MediaVise®, its patented corrugated crushing plates deliver over 40,000 pounds of force to the platters and read heads of the drive. In less than a minute, the hard drive is crushed, mangled and rendered unreadable and discharged into a debris collection bin. No other HDD destroyer offers this combination of interlocking hardened steel plates and massive crushing force.

The MediaVise was specifically engineered to meet NSA specifications for HDD and provides the highest level of security.

The MediaVise Difference:

- **Complete warping of hard drive using patented, corrugated, interlocking, hardened steel plated design.** Machines that only "fold" hard drives actually leave surface area on a platter intact. The MediaVise's patented crushing plates specifically target the entire platter.
- **Maximum crushing force.** Many of the machines that "fold" or "punch" a hard drive deliver a relatively low amount of crushing force. The MediaVise delivers 40,000 lbs. of force, leaving the drive completely mangled and destroyed.
- **Hassle free automated system.** This is the only system that does not require adapters or careful positioning of hard drives. Simply insert the media and press start. The collection drawer means there is never a need to manually remove a drive.
- **New:** HEPA filtration of airborne particulates promotes highest standards of worker and environmental safety.

Product Specifications

Media Accepted	2.5 & 3.5" HDDs cell phones DLT and LTO tapes
Maximum Media Size	5.75" x 4" x 1.25" (HxDxW)
Dimensions	25" x 19" x 12" (HxDxW)
Shipping Dimensions	30" x 22" x 22" (HxDxW)
Weight	185 lbs (excluded packing)
Power	120/220 & 240 Volts, +/- 10%, 60/50 Hz
Max Current	13Amps @ 120 Volts
Crush Cycle Time	30 Seconds
