

HOW DOES AHMEN GROW????

By Dr. Tom Camp

Over the years I have been fascinated with the idea of watching AHMEN grow from a small 12 person medical mission, 19 years ago, to the organization it is today. I think all of our team leaders feel we are following the premise of God and taking care of the disenfranchised of Honduras in various ways.

That being said, “It’s a God Thing” team, headed up by Bucket (Larry Guthrie), appears to be splitting off two new teams this year.

Since its first trip, “It’s a God Thing” has grown and expanded their evangelism work. The team also has an active Eye Glass Program and involvement in Shalom.

Bucket has worked to “grow” his team members in their work in Honduras and two of them have expressed interest in developing their own team.

In the coming year it appears Bucket will continue a primary Evangelism Team (Bucket’s DoNut Ministry of Honduras). He has a unique approach to Evangelism work. He takes his team, with their enthusiasm, donuts, eye program, music, etc. and to local Cruzadas churches working with the local pastors in their church.. He is aware that his team “draws people to the church”, but the real work and follow up is done by local pastors and their

support staff. His interest is not in building a “Bucket Empire”, but in supporting the local church they work in that day.
