Open: Wednesday-Friday 11-6, Saturday-Sunday 12-5

October 7 - 30, 2016

Perspective by David Alfuth

Opening Reception:
Friday, October 7, 6 - 8:30 pm

Webster's New World Dictionary of the American Language states that a Collage "A kind of surrealist art in which bits of flat objects, as news paper, cloth, etc. are pasted together in a incongruous relationship for their symbolic or suggestive effect."

I am a Collage artist that adds one more quality to all of my work. That is the element of depth. I am a three dimensional artist that creates both relief and free standing Collage Sculptures.

This exhibit, Perspective, represents two years of work using, Architecture and Perspective. My works create surrealistic structures, ceilings, and architectural images giving the viewer a magical view not possible in the real world. The structures appear to recede many miles to create unrealistic effects. The ceilings appear to disappear into the vastness of space. The three dimensional sculptures create amazing images on the outside as well as the inside.

I want the viewers to experience a moment of wonder and amazement when looking at each one of my works.
