Support Student's Right to Privacy and Safety

1. Be it resolved that we urge the Minnesota legislature and governor protect public school children's right to privacy and safety in school locker rooms, bathrooms, showers, and other facilities where students may be in a state of undress.

Failure to do so:

- Violates the privacy of individuals who are forced to share locker room, bathroom, and other facilities with individuals of the opposite biological sex.
- Violates parents' rights to control their children and upbringing on matters of sexual concern.
- Raises safety concerns for young girls and boys who are forced to share restroom, locker room, and other facilities with opposite biological sex individuals.
