

Both tardiness and chronic absenteeism cause time away from instruction and greatly impact students and their ability to progress academically.

DID YOU KNOW

There is a direct correlation between school attendance and employability?

- We believe students are assets and a source of pride for the community.
- We believe that every student has the ability to learn and is entitled to every opportunity to do so.
- We believe that by addressing the cause of low attendance, we are opening up opportunities for every student.

TAPP FAMILY ADVOCATE Will

- Access and evaluate the needs and barriers to improved attendance unique to specific students.
- Obtain the resources and supports necessary to cause an improvement in absenteeism and attendance.
- Empower and design a system of combined resources that will sustain continued improved participation of each student in their education for the future.

WHO CAN PARTICIPATE

The Tribal Attendance Pilot Program (TAPP) was written specifically for Native American students with poor attendance at Toledo and Siletz Schools. Although, we are able to serve all students to increase overall school attendance.

GOALS

Improved attendance and decreased tardiness

Improved grades

Build stronger relationships between parents and students, community and schools
