

Hilton Historic Bayfront

Context-Appropriate Lodging

The 88-room Hilton Historic Bayfront is themed around Second Period Colonial Spanish Architecture. It blends with the surrounding buildings and history of downtown in its scale and detailing.

The hotel is complete with a parking garage hidden underneath to accommodate guests. Local elements such as coquina shell and brick were used in the hardscape.

Marquis Halback, Inc. provided hardscape and landscape design services for the hotel and adjacent streetscape.
