**West Fork Humptulips River Trail**

The trail follows the remote and picturesque West Fork of the Humptulips River through dense old growth forest and open glades along the river corridor. The Lower West Fork Trail is 9 miles in length with multiple river crossings, attempt to ford only at low water. Single-track trail grades are generally 0-10% with a few grades of up to 20%.

**Wynoochee Lake Trail** Park near the dam on the south end of the lake. The 13 mile loop will reward your efforts with beautiful lake, old growth forest and waterfall views. Intermediate, single track riding. Attempt river ford at north end of lake only at low water. You may travel two miles farther, past the lake on the north end, for a bridge across the Wynoochee River. On this route you have the option to use logging roads for part of your return to the dam.

**Logging Roads** Hundreds of miles of gravel logging roads criss-cross the remote hills of Grays Harbor County, US Forest Service lands are open to all, as are State Department of Resources lands. Private timber lands are open in some areas and paid permits required in others. For private lands please consult with the landowners.

**4 Mountain Biking in the Montesano City Forest & Lake Sylvia State Park**

The Montesano City Forest is a treasure! This is a working forest, dedicated to providing income through timber to the city of Montesano, while also providing wildlife habitat and areas for recreation. This city is welcoming to mountain bikers, hikers and runners using the trails.

**West Fork Trail**

West Fork Trail is the flattest trail in this hilly forest. It is suitable for a novice. From the state park parking lot, ride north along the shore of Lake Sylvia, exiting the state park through a gate at the end of the lake. From here on you are in the Montesano City Forest. Continue on trails and logging road along the West Fork Sylvia Creek. After a small hill the way flattens out again. Travel 5 miles through verdant forest surrounding the creek. At mile 5 the trail ends at a logging road. You can turn around and enjoy the trail in the other direction or navigate the logging roads and additional trails for a loop back to Lake Sylvia State Park. More detailed maps are available at [www.montesano.org/DocumentCenter/View/394](http://www.montesano.org/DocumentCenter/View/394)

**Other City Trails**

Many other trails traverse the hills and valleys of the Montesano City Forest and Lake Sylvia State Park area. Most of these single track trails are for advanced riders due to steep terrain, tree roots and other hazards. The logging roads provide great riding as well for novice and intermediate riders. Watch for log trucks.

**Be a safe bicycle rider. Follow these simple rules.**

Always wear a helmet while riding. Helmets required in the City of Aberdeen.

Be courteous. Audibly alert pedestrians as you approach. Yield to pedestrians in the crosswalk, on sidewalks, pathways and trails

Choose the best way to turn left:

- LIKE A CAR - scan behind, yield, signal and when safe, move into the left lane and turn left.
- LIKE A PEDESTRIAN - dismount and walk your bike across the intersection in the crosswalk.

RCW.46.61.755 states: Traffic laws apply to persons riding bicycles. Obey all traffic signals, signs and lanes. Ride in the same direction as traffic.

CAUTION: Always watch for cars or trucks stopping or turning.

**SAME ROADS . SAME RIGHTS . SAME RULES**

Signal before turns & lane changes.

Check behind & ahead before turning. Yield to vehicles with the right of way.

Left      Right

**Be Visible . Be Alert . Wear a Helmet . Have Fun!**

Be visible day or night. Wear bright clothes.

RCW 46.61.780 states: At night you must have a white headlight and tail light or red rear reflector.

Cyclists may choose to ride on the path, bike lane, shoulder or travel lane as suits their safety needs. Riding on sidewalks is generally allowed unless marked.

Ride predictably. Leave adequate space between you and parked cars. Be careful of opening car doors. Do not weave in and out between parked cars and traffic.
