PhagiaFlex™ is intended for use under the supervision of a speech-language pathologist. It is easy to use, but in order to obtain maximum benefit, it should be incorporated into a dysphagia therapy plan of care. Only an SLP/physician can safely determine when a patient is ready to advance a modified diet, or to begin p.o. intake. Swallowing exercise devices should only be used with physician approval. Swallowing exercise devices may be contraindicated for people with neck injuries or TMJ as well as other individual conditions which must be determined by a physician.
