

Did you know?

A wombat on a reserve munches on carrots. Wombats in the wild prefer to feed on grasses, roots, and bark.

Q: How does a dog stop a video?

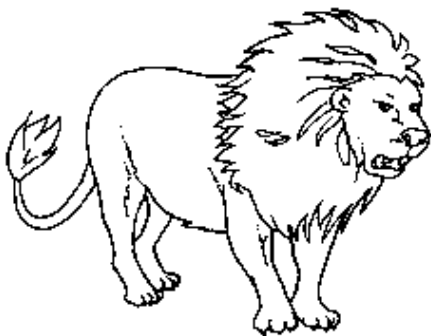

A: He presses the paws button.

Q: What is the snake's favourite subject?

A: Hiss-story

Did you know?

Both male and female walrus have tusks and have been observed using these overgrown teeth to help pull them out of the water.

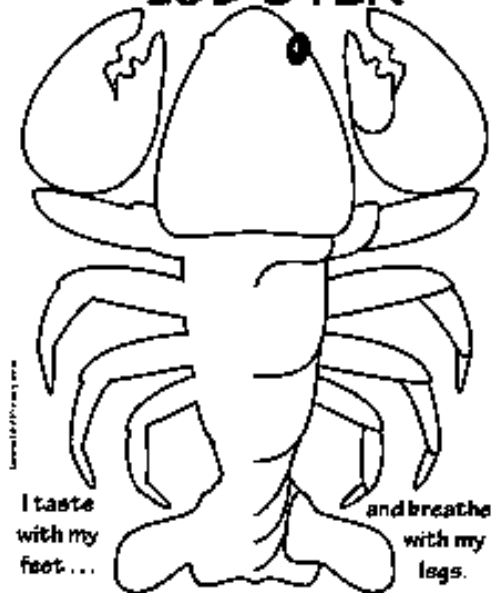

Colour as in.

Please.

LOBSTER

I taste with my feet...

and breathe with my legs.

Did you know?

Chimpanzees are our closest living relatives, sharing more than 98 percent of our genetic blueprint. Humans and chimps are also thought to share a common ancestor who lived some four to eight million years ago.
