Introduction

CHASE will offer up to 75 AHRC studentships for entry in October 2018. This will be the fifth round of studentship funding by the CHASE DTP, and the last under the current block grant.

All studentships will be allocated on merit, with no pre-allocation to any CHASE institution or discipline. As previously, candidates will apply to the institution at which they wish to study; at this stage, they also need to indicate if they would like to be considered for CHASE AHRC funding.

Each CHASE institution (at departmental level or equivalent) remains responsible for reviewing applications, interviewing candidates, making offers and allocating supervisors. CHASE institutions will follow best practice in equal opportunities, ensuring that all potential applicants have fair access to funding. Proposed candidates will be forwarded to a ‘Primary Selection Panel’ at the institution to which they are applying.

Candidates put forward for CHASE funding must have been interviewed at their ‘home’ institution, and a main contact supervisor (or two supervisors in the case of co-supervision between institutions) must be identified before the application can be considered by the Primary Selection Panel. All interviews and selection at home institutions must take place before 28 February 2018.

Candidates for CHASE funding must apply using the online application portal at www.chase.ac.uk/apply.

The Primary Selection Panels have responsibility for making nominations to one of the CHASE selection panels. CHASE will run 4 selection panels to consider applications forwarded from institutions, as follows:

- A. History, Thought and Systems of Belief
- B. Art History and Visual Cultures
- C. Media and Creative Practice
- D. Literature, Language and Culture

Each panel will include a range of expertise and one subject specialist from each CHASE institution (i.e. normally a panel of 7, with quoracy set at 5-7); panels will be chaired by a member of the CHASE Management Board (on rotation, with 4 different institutions providing the Chairs each year). The recommendations of the panels will be combined into a single ranked list by the CHASE Management Board at its meeting on 5 April 2018 and offer letters sent out by 9 April 2018.
Changes for 2017-18

The following changes were agreed by the CHASE Management Board in its yearly review of the selection process:

Collaborative Doctoral Award competition

AHRC has allowed Doctoral Training Partnerships to run a separate competition for Collaborative Doctoral Award studentships. CHASE will offer a small number of such studentships from the AHRC grant (the number will depend on demand for projects and quality of proposals). Supervisors may apply for project funding by 8 January 2018. Please see the separate call document for further details.

Formatting of application form

There are several small changes to the application form:

- Questions on professional and educational experience will be easier for reviewers to read
- There is a separate space for a bibliography of up to 20 items
- Applicants are invited to identify language training needs to support their project.

Applicant advice

CHASE invites potential applicants to an information event on 23 October 2017, 2-5pm, at BFI Southbank in London. We will also host a Google Hangout Q&A session for applicants on 22 November 2017. Full details are available on the CHASE website.

Communicating outcomes

This year, only successful applicants will initially be informed of the outcome on 9 April. This is to reduce confusion for applicants who are the beneficiaries of declined offers further up the ranked list, which can happen quite quickly after the initial offers are issued. All applicants will be informed of the outcome by 23 April 2018.
## Timetable for recruitment and selection

Advertising

The CHASE studentship competition will be launched on Monday 9 October, and will be advertised as follows:

**Centrally** – via the CHASE website, and via the @CHASE_DTP Twitter feed.

**Externally** – Advertisements will be placed in FindaPhD.com and jobs.ac.uk, the most widely used resources for students seeking doctoral funding. CHASE will also have a presence at the ‘FindaPhD Live’ events in Oxford and London.

**Locally** – via institutional funding webpages. We also welcome notifications on subject-specific mailing lists, and appropriate post-holders in faculties or departmental areas are invited to use the template in the appendix to this document.

References and supervisor statement

Candidates are asked to provide two referees. Referees will be asked to comment on the academic record of the candidate, on the quality of their research proposal and on their preparedness for doctoral study. References from non-academic sources (e.g. publishers) are welcome but must cover these areas. One or both referees may be the candidate’s prospective supervisors.

As in previous years, supervisors will be asked to provide a statement in support of the candidate’s application for funding for their proposed project (in addition to any reference supporting the candidate’s application for a place at the home institution).

While references will focus on the quality of candidates, the supervisor’s statement should focus on the quality of the proposal, including the research environment (at both ‘home’ institution and, where possible, within CHASE) and the ‘fit’ with supervisor’s expertise and interests. This statement does not need to be lengthy (500 words) but it does need to address the candidate’s proposal directly in terms of its strength, interest and feasibility. It should draw on interview performance. If the proposal is highly technical and its significance unlikely to be fully appreciated by a non-specialist reader, the supervisor statement should be clear on the proposal’s merits within its disciplinary field.

Equal opportunities

In line with RCUK expectations for equality and diversity, CHASE promotes equality of opportunity for all eligible doctoral candidates. Academic colleagues across CHASE are asked to ensure that they promote equality and diversity in their nominations for CHASE funding. This includes taking advantage of equality and diversity training offered at CHASE member institutions, to address disincentives and indirect obstacles to recruitment. The CHASE Management Board supports the [RCUK Action Plan for Equality, Diversity and Inclusion](#).
Selection criteria

Applications will be judged against the following criteria:

1. Research proposal (50%)
   - The proposal is clearly written and demonstrates engagement with an academic field at a high level of sophistication.
   - The project demonstrates original thinking in its field.
   - The methodology proposed clearly demonstrates the viability of the planned research.
   - The planned research is described in a way that inspires confidence that it will definitely be completed within three years.

2. Preparedness for research (25%)
   - The applicant demonstrates understanding of appropriate research skills required for successful completion of the project.
   - The applicant has appropriate training at Master’s level or equivalent to undertake the project.
   - The applicant’s references fully support the applicant’s preparedness for doctoral study.

3. Suitability of research environment (25%)
   - The research environment (as constituted by the proposed supervision, the home department(s) or equivalent, the institutional support (including available archives, sources, research centres), any external organisations) is appropriate to the project.
   - The applicant has given clear thought to the fit between their project and their proposed research environment.
   - The supervisor statement fully supports the project’s fit with the proposed research environment.

A set of grade descriptors for each of these criteria is published on the CHASE website as part of the guidance for applicants.
Process for recruitment and selection using the online application system

Stage 1: Application

As previously, access to the application form will be controlled by CHASE institutions. Candidates must have submitted an application for study to their chosen institution to be given access to the CHASE application form. Institutions will allow access to the form at different stages in their selection process; please check your institutional process and deadlines. Please note that as last year there is a single deadline for all parts of the process, rather than separate deadlines for applicants and supervisors/referees.

1) Once a candidate is approved, administrators can send them the access code for the system. (Note: candidates can create an account on the system without the access code, but they will not be able to complete or submit an application.)

2) Once registered, the candidate will see the ‘applicant home screen’, with four tasks to complete: the application form, two references and a supervisor statement. These must be done in sequence: the application form task must be complete before the candidate can request references and supervisor statement. All tasks must be completed before the application can be submitted, including receipt of references and supervisor statement.

   a) Application form
      The form is four pages long. Candidates can save their progress at any time, and return to it later. The form remains editable up until the institutional closing date. After this all forms will be locked. (Note: forms selected for progress to CHASE assessment panels will be unlocked for minor editing following institutional selection panels.)

   b) References
      Candidates must nominate two referees to provide references via the system. The candidate completes referee details (name and email address), and the referee receives an email with instructions to complete their reference. The candidate may resend this email as a reminder if necessary. Referees may copy and paste an existing reference if preferred. References should describe the qualities of the candidate and their project, and their preparedness for research. Candidate is notified by email when references have been submitted.

   c) Supervisor statement
      The candidate completes supervisor details and the supervisor receives an email, as above. Supervisor statements should complement the references, commenting on the project’s fit with the supervisor’s interests, and the institutional/CHASE research environments, as well as providing context for technical proposals. Candidate is notified by email when the supervisor statement is submitted.

3) Once all tasks are complete, candidate may submit the application. Application automatically transfers to Stage 2 on submission. The candidate receives an email confirming submission and detailing next steps.

4) Submission deadline will vary depending on institutional processes.
Stage 2: Institutional Selection

This stage is managed locally by CHASE academic and administrative leads. Due to factors of size and institutional policies and procedures, CHASE institutions will have different processes to arrive at the shortlist to progress to Stage 3. Please check your institutional process and deadlines.

1) Institutional selection processes will result in a list of up to 25 students per institution to go forward to Stage 3, and will also identify the panels to which they will be submitted.

2) The administrative lead completes an online form to identify candidates to progress, and provides a list via email for the central CHASE team to double-check. Central CHASE team manually transfers these candidates to Stage 3 after 28 February 2018.

Stage 3: CHASE selection panels

1) Panel members attend a briefing webinar on 23 February (or view online afterwards).

2) Panel members log in to Fluidreview and view applications assigned to their panel, and score them against the criteria.

3) The CHASE team collates all scores and circulates to panel members in advance of the panel meetings. Scores are only circulated once all panel members have ranked the applications.

4) At the panel meetings, panels consider a list of applicants ranked by average scores, and amend scores based on discussion.

5) The Management Board receives a consolidated list of applications with panel scores for each, ranked by score. The Board also receives a sample set of applications across the scoring range to assist with moderation across panels.

6) At its meeting, the Board considers the consolidated list. It receives a report from the external observer who has attended all four panel meetings, and reports from the four panel chairs. Based on these reports, and on consideration of the sample set of applications, the Board is able to moderate the scores assigned by the panels as it sees fit.

7) The Board issues a final list. AHRC funding is applied to the highest-scored 46 applications, and institutions apply match funding as available moving down the list. Remaining institutional funding may be used to wholly fund studentships.

8) Successful candidates will be informed of the initial outcome of the process on 9 April 2018.

Frequently Asked Questions

Can I apply to more than one AHRC Doctoral Training Partnership (DTP)?
Yes. There is no limit on the number of DTPs to which you can apply.

What does CHASE stand for?
Consortium for the Humanities and the Arts South-East England.

Can I apply to more than one institution within CHASE?
CHASE discourages applications to multiple institutions. Candidates are advised to research which institution offers the best fit for their project, in terms of supervision and resources. CHASE also supports co-supervision between institutions.

Can I apply directly to CHASE?
No, you must apply through and with the support of the CHASE institution at which you have applied to study.

Does CHASE fund Masters programmes?
No, but there are a number of non-CHASE scholarships for Masters available at the member institutions.

Can I apply if I have started a PhD?
Yes, you may still be eligible for an AHRC studentship funding providing that, at the start of the award, you will have at least 50% of your period of study remaining.

If I am unsuccessful this year, can I reapply for funding in 2018?
Yes.

Can I apply this year (2018) for deferred entry in 2019?
No, candidates seeking AHRC funding for 2019 entry should apply to the 2019 CHASE studentship competition.

How does the CHASE AHRC studentship selection process work?
There will be two stages to the selection process. The first will take place within the CHASE institution(s) to which you are applying for a PhD place during February/March 2018. If you are shortlisted by the CHASE institution, your application will then be submitted to a second selection process at CHASE level.

If I already have a PhD from an overseas university can I still apply?
If, by the start date of a studentship, you will have already gained or completed the requirements for a doctoral degree in any subject, however funded, you will not be eligible to receive doctoral studentship funding under any scheme.

I am from the EU, can I get a full award?
Subject to their academic eligibility, students from EU countries other than the UK are generally eligible for awards restricted to the payment of tuition fees only and no maintenance award. However if you have been resident in the UK throughout the 3–year period preceding the start of the course (including full time education) you may be eligible for a full award. See the Guidance Notes for further information on eligibility.

I’m an international student studying at a UK University / Higher Education Institution– am I eligible?
No, international students are unfortunately not eligible for AHRC funding. Please contact your institution for other funding opportunities.
SOAS and Birkbeck are part of CHASE now. Can I apply for a studentship at either of these institutions? SOAS and Birkbeck do not currently offer CHASE studentships, but participate in CHASE researcher development.

How many references do I need altogether? You need two references to be completed via the application system. These can be from the same referees that supported your PhD application. One or both of your proposed supervisors can also be your referees if appropriate. Further information about what is needed to support your CHASE funding application can be found in the Guidance Notes.

When will I know if I have funding? CHASE will inform successful applicants of the outcome of their application by 9 April 2018, and all applicants by 23 April 2018.

Is there an appeals process? The decision of the CHASE Management Board is final and there is no recourse to any further appeal process.

Does the CHASE DTP promote interdisciplinary research? Yes, we welcome proposals that work between disciplines.

What makes a good application? Please see our Guidance Notes and discuss with your supervisor.

Is my personal information secure on the CHASE application system? The system is UK Data Protection Act compliant. Fluidreview’s servers are situated in Canada, which has comparable data protection laws to the UK.

Does CHASE offer London weighting for stipends? As per the RCUK Training Grant Guide, CHASE offers London weighting to eligible students who are studying at London institutions (Courtauld Institute or Goldsmiths). It is not applicable where students are studying at other institutions but choosing to live in London.
Appendix: Sample posting to subject mailing list

Subject: CHASE AHRC PhD Studentships at [institution]

The Department of [department] at [institution] invites applications for October 2018 entry to our PhD programme.

[institution] is part of the CHASE AHRC Doctoral Training Partnership (alongside The Courtauld Institute of Art, the Open University, the Universities of East Anglia, Essex, Kent and Sussex, Goldsmiths, University of London, Birkbeck, University of London and SOAS, University of London [delete your own institution!]) and successful applicants for PhD study will be able to apply for studentship funding.

Our intellectual environment fosters the problem-driven and cross- and interdisciplinary research vital to addressing the new challenges of a world shaped by the speed of technological innovation and global change. Understanding and promoting the value of human culture and creativity in addressing such challenges is central to the CHASE vision of postgraduate research and professional development.

We support discipline-based projects, but also specialise in interdisciplinary research and research in emerging fields of study and creative practice. Our research and training environment encourages our doctoral students to develop interdisciplinary methodologies and to explore how to integrate their research with developments in digital technologies. In addition, our network of partnerships with leading arts and humanities organisations and creative industries provides an outstanding resource for future CHASE scholars.

Applications for funding will be considered by [institution] with the best applicants put forward to four CHASE selection panels. Applications will be considered on a competitive basis.

For UK students, these awards cover both fees and maintenance and for EU residents awards are on a fees only basis. The funding will cover professional development opportunities, including the enhancement of public engagement skills and placements with CHASE partner organisations in the UK and overseas.

To be considered for one of these awards, please note that you need to have applied to a PhD programme by 10 January 2018. We encourage you to contact us as early as possible to discuss your proposal.

For any enquiries to the PhD programme of [department] please contact the PhD admissions tutor, [admission tutor name and email]; and to see staff expertise please consult our website [URL for staff directory].

For full details of the subject areas covered, and how to apply, please see the CHASE website: www.chase.ac.uk
