of Catapú and environs*

The Birds of Catapú

Welcome to Catapú in Sofala Province, an area which has remained well-forested despite road construction and increased pressure by people living in poverty. A hotspot for bio-diversity, centre of flora, mammal, bird and insect research, including the unique TCT Catapu Cheringoma Herbarium. M'phingwe specials include: African Pitta, Southern Banded Snake-eagle, Chestnut-fronted Helmet-shrike, Green-backed Woodpecker, White-chested Alethe...Walk the Suni Trail to discover the trees and birds of Catapú

Birds with an * are those recorded on Catapú, those in **bold** have been seen in the immediate vicinity. Unformatted birds are bound to be in the area, but to our knowledge, have not yet been recorded. This list was compiled by Ian Riddell, head of BirdLife Zimbabwe's Regional Atlas and Rarities Committee. It includes data provided by Geoff Lockwood, Etienne Marais, Greg Davis, Vincent Parker, the Mutare Bird Club, BirdLife Zimbabwe and many others. We are still compiling, so if you see something we haven't recorded, please let us know by dropping Ian a line to Ian Riddell at raczim@birdlifezimbabwe.org.

Happy Birding!

The Living Herbarium Tree List

Twelve years ago TCT Dalmann contacted Meg Coates Palgrave and requested this southern African tree expert to assist in the identification of the many tree species on Catapú. That marked the beginning of a partnership which has led to extensive botanical research and the establishment of the TCT- Catapú Cheringoma Herbarium.

Meg has now identified over 260 tree species and collected about 1,400 specimens, now housed in the herbarium, which is used for research and the continued education of many students. This booklet is your guide to the Living Herbarium, which is the Suni Trail on the map at the beginning of this booklet. Trees are marked with green discs indicating the paths and the numbers on these discs correspond to the names of the trees within this booklet.

Enjoy the trail!

Pro - Sofala Verde - PSV

Keeping Sofala green, together

What makes this area different from elsewhere?
One private enterprise committed to the environment and the community, a local association and a community united in conservation. Several years ago management at TCT Dalmann management decided to engage the surrounding community in eco-friendly income generation.

Today Pro Sofala Verde - PSV works with local communities to keep Sofala green by sustainably enhancing livelihoods in an eco-friendly manner. We focus on community based reforestation of fire-damaged areas in communal lands with indigenous trees and sustainable bee-keeping using top bar bee-hives. Our project is named Living Forests Endeavour 4 Sofala and our partner organisation is the Life4Sofala Foundation. TCT Dalmann at Catapú provides day to day project management.
