Capability Statement
ABOUT US

Electrical Projects Australia (EPA) was established in 1986 and is New South Wales’ most prominent electrical design company.

Operating from our Newcastle & Sydney offices EPA consists of team of experienced electrical engineers, design draftspersons, draftspersons, site supervisors, tracers and secretarial staff.

Specialising in the provision of electrical engineering, consulting and project administration services to the commercial building, public building, public infrastructure, alternate power generation, mining, cotton, grain handling and general industrial markets EPA offer a highly competitive and cost effective service.

We have developed a level of expertise in our chosen fields which allows us to provide a professional service to our valued customers. We have developed a sound basis of technical skills reinforced with practical experience and can provide a range of services that ensure that our clients requirements are fully satisfied.

QUALITY

EPA projects are set up with a Project Quality Plan. The PQP is developed to ensure quality objectives are met in accordance with our Client’s requirements. The PQP is regularly reviewed and updated throughout the project to ensure appropriate quality over the duration of the project.

Quality control through consistent monitoring is performed on all projects to ensure compliance with procedures and conformance to Australian Standards, codes and specifications.

EPA is currently seeking AS9001 accreditation. Several companies, including Pacific Power, RICO and Saipem Australia have independently assessed EPA and found that we met their exacting standards.

OUR TEAM

Lead by Director, Paul Malanchuk, who has over 20 years of experience within the Electrical Engineering industry our experienced and dedicated employees are the driving force of our company.

At Electrical Projects Australia, our team of experienced professionals is the driving force of our company. EPA is made up of five highly skilled and knowledgeable Electrical Engineers, three drafting personnel with over 50 years’ combined experience in the electrical design industry and two accomplished administrative/support persons.

At Electrical Projects Australia, our focus is on providing projects to budget, on time and above the expectancy of our clients.
SCOPE OF SERVICES

Electrical Projects Australia Pty Limited offers an Engineering, Consulting and Project Administration service covering a range of specialised activities in the Government, Industry, Commerce and Mining sectors.

Electrical services can be provided in the following general areas:

**Industrial and Mining**
- Materials Handling
- Pumping and Sewerage
- Load Flow Studies
- Energy Management
- High and Low Voltage Distribution Systems
- High Voltage Earthing Design
- Arc Flash Analysis
- Plant Rehabilitation and Refurbishment
- Ventilation
- HV Substations
- PLC and Data Systems
- Hazardous Area Assessment & Design

**Commercial**
- Lighting and Power Design and Documentation
- Architectural Lighting
- Fire System Design
- Security System Design
- Building Management Systems
- Energy Management
- Data Communication and Telephone Systems
- High and Low Voltage Reticulation

**Hazardous Area Services**
- Hazardous Area Classification & Design
- Conformity Assessments

The Services available can be utilised in their entirety, on a turnkey basis, or can be selected from the following:-

- Project Management
- Design and Documentation
- Specification Writing
- Technical Inspection
- Fault Finding and Analysis
- Drafting and Tracing
- Commissioning
- Client Representation
- Concept Design
- System Studies
- Manuals
- “As Built” drawings
- Promotional documentation
BUILDING SERVICES

EPA are experts in the provision of Electrical Building Services Design.

We specialise in Building Services for both new buildings and refurbishments of existing buildings and have worked on a number of major projects throughout Sydney, Central Coast and Newcastle and throughout Australia.

EPA can provide Electrical Building Services to a variety of sectors including:

- Accommodation & Housing,
- Cultural, Clubs, Shopping & Commercial Developments,
- Sporting Facilities,
- External, Landscape and Architectural Lighting,
- School Education, Technical and Further Education and Universities,
- Hospitals, Medical and Aged Care

INDUSTRIAL & MINING SERVICES

EPA has serviced the industrial sector in electrical engineering for more than 25 years. From pre-feasibility and design phase right through to commissioning, EPA have the relevant skills and experience to meet our client's needs.

Our dedicated team specialise in Power and Control System design and development, engineering reports and commissioning services.

We also have experience in programming and implementation of PLC and SCADA systems including Allen-Bradley/Rockwell, Citect, Klockner Moeller, Modicon and Schneider Automation.

Industrial clients of EPA include Sibelco Australia, Aviagen and Boral National Resource Management.

Industrial engineering services we provide include:

- Project Management
- Fault Finding & Analysis
- System Studies
- Manual Preparation
- Load Flow Studies
- Hazardous Area Assessments
- Power & Control System Design and Development
- PLC and SCADA Programming
- Commissioning Documentation and Supervision
- Switchboard Design
- Arc Flash Studies
- ARC Flash Assessment to IEEE1584
- Transient Motor Start
- Harmonic Analysis

EPA uses the following systems "in house" as aid to production:

- AGI32 (lighting design)
- AutoCAD
- Microsoft Office
- Powertools
- Numerous Lighting Design Software Packages
- Power System and Cable Design Software Packages

We have programming experience in the following PLC and SCADA Systems:

- Schneider Automation
- Allen Bradley/Rockwell
- Citect
- GE Fanuc
- Texas Instruments
- Modicon
- Hitachi
- Klockner Moeller

Bradken Multi-Function Facility
HAZARDOUS AREA CLASSIFICATION & DESIGN

EPA can provide Hazardous Area Electrical Design for industrial work environments where there are likely to be highly volatile and dangerous work areas.

AS/NZS 60079 series requires the owner of a hazardous area electrical installation to keep and maintain a dossier including information on the installation's operation, testing, certification, inspection, maintenance, and repair.

Our specialist engineers are trained in Hazardous Area Design, Installation and Inspection and can provide the following services:

- Hazardous area classification
- Initial, sample and periodic equipment inspections
- Hazardous area design
- Conformity assessment of overseas certified equipment
- Design and installation compliance reviews
- Hazardous area verification dossier compilation

ARC FLASH ASSESSMENT

An Arc Flash is the plasma cloud that develops during and following an electrical fault, whereby the insulating properties of air are overcome through rapid ionisation.

An arc flash is an uncontrolled chaotic event, as opposed to the controlled interruption of electrical arcs that are a normal part of electrical operation to interrupt current within an item of switchgear such as an isolator, circuit breaker or contactor.

Electrical Projects Australia has staff who are highly trained in Arc Flash and can provide your company with an Arc Flash Assessment to ensure the highest level of safety is achieved.

As an employer, under the Work Health and Safety Act 2011 it is the responsibility of a person conducting a business or undertaking at a workplace to keep their workers safe and prevent a potentially catastrophic event from occurring.

If an arc flash accident occurred and the employer had reasonably practicable means of preventing it, the employer may be liable under the act.

RECENT EXPERIENCE

Electrical Projects Australia have recently been involved in the following notable projects:

**Project:** Lawler Partners Newcastle Commercial Office  
**Client:** Core Project Group Pty Ltd  
**Details:** Electrical Projects Australia were the Electrical Consultant responsible for the Design and Documentation and Contract Administration of the new three storey office & extension to existing office and car park located at 755-753 Hunter Street, Newcastle.

**Project:** Eclipse Residential Development  
**Client:** CKDS Architecture  
**Details:** Design, Documentation and Contract Administration of all electrical works for New Eclipse Residential Development. The Development will be located at Union Street Cooks Hill and will include 94 apartments.

**Project:** NAT Grain Terminal Newcastle  
**Client:** Newcastle Agri Terminal  
**Details:** Design, Documentation and Contract Administration of all electrical works for New NAT Grain Terminal Newcastle Port. Construction has commenced at the $28m Newcastle Agri Terminal (NAT), the city’s second grain export facility and the first major grain port built in NSW for 25 years. Works are slated for completion in June 2013.

**Project:** Sibelco Australia Charbon (SCADA)  
**Client:** Sibelco Australia Pty Ltd  
**Details:** Programming & Commissioning of Supervisory Control & Data Acquisition System.

**Project:** Whitehaven Coal, Narrabri Coal - Coal Washery  
**Client:** DMI Electrical  
**Details:** Electrical Project Engineers for electrical works for Narrabri Coal ROM Bypass.

**Project:** Lighting Specification and Design, Energy Savings Scheme  
**Client:** The City of Newcastle (Newcastle City Council)  
**Details:** Upgrade the lighting in their major buildings. The objective of the works is to implement more energy efferent and low maintenance lighting systems. The design has a focus on utilising new technologies such as LED and advanced lighting control methods.

**Project:** Midal Cables, Aluminium Cable Manufacturing Facility Tomago  
**Client:** Midal Cables  
**Details:** Design, Documentation and Contract Administration of all electrical works for the $30M Aluminium cable Manufacturing Facility Tomago.

**Project:** Bradken Multi-Function Facility  
**Client:** EJE Architecture  
**Details:** Design, documentation, and project administration of the new Steel River facility.

**Project:** St Patrick’s Primary School, Macksville  
**Client:** DRA Architects  
**Details:** Design & Documentation of the Electrical Services for a new Catholic Primary School in Macksville on the Mid North Coast of NSW.

**Project:** Residential Development - Crebert St Mayfield  
**Client:** Catholic Diocese of Maitland-Newcastle  
**Details:** Design & Documentation of the Electrical Services for 22 brand new one, two and three bedroom units for single, double or family occupancy at affordable rates; along with two supported accommodation homes.

**Project:** Tattersals on Watt  
**Client:** Blue Visions  
**Details:** Design & Documentation of the electrical services for 56 apartments (29 x 1 bedroom, 26 x 2 bed and 1 x 3 bedroom), in Newcastle central.
Electrical Projects Australia have experience in a variety of different areas. Below are just a few of the projects we have been involved with over the years.

**Public Schools**
- Dubbo Senior Campus
- Kellyville High School
- East Hills High School Gym
- Kiama Public School
- Macarthur Girls High School
- Wheeler Heights Public School
- Bass Hill High School
- Chatswood High School
- East Hills Boys High School
- Hilltop Road Public School
- Waratah High School
- Kirkton Public School
- Wauchope High School
- Floraville Public School
- Currawah Public School
- Pagewood Public School
- Jilliby Public School
- Mount Riverview Public School
- Ashford Central School
- West Wallsend Public School
- Darlinghurst Public School
- Dural Public School
- Hunter River High School Lift
- Cabramatta High School
- Clarke Road Public School
- Toomelah Public School – Block E Upgrade
- Hunter River Community School
- Bates Drive Public School
- Wairoa SSP
- Cromer Public School
- Linuwel Steiner School
- Gosford Public School relocation
- William Rose School SSP
- Scone Grammar School
- The Ponds SSP
- Hunter Christian School Primary Classrooms
- Seven Hills Public School – New Canteen & Classroom
- BER Project – Over 90 Schools for Bovis Lend Lease
- BER Project – New England & North Coast – Over 300 Schools
- Ulladulla High School – Stages 2 & 3
- Great Lakes College – Stages 1 & 2
- Ashfield High School - Gymnasium
- Wagga Wagga High School
- St Phillips Christian College – Performing Arts Centre
- East Hills Girls High School – Admin & Workshop
- Biddabah Public School
- Avoca Beach Public School
- Erina Height’s Public School
- Glenore Public School
- Scone Public School
- Flinders Public School
- Private/Catholic Schools
- Holy Family Primary School, Merewether
- St Joseph’s, Wee Waa
- St Pius High School, Kotara
- St Joseph’s Primary School, Tamworth
- St Patrick’s Primary School, Cessnock
- St Joseph’s Primary School, Merewether
- Holy Name Primary School
- St James Primary School, Muswellbrook
- St Joseph’s High School, Aberdeen
- St Joseph’s, Lochinvar
- St Paul’s Public School, Rutherford
- St Patrick’s, Wallsend
- St Mary’s, Maitland
- San Clemente’s East Hills Girls High School – Staff Room
- St Joseph’s, Denman
- St Phillips, Salamander Bay
- St Mary’s, Gateshead
- St Peter’s, Maitland
- St Pius X Power Upgrade
- St Columban’s, Mayfield – Access Upgrade
- St Joseph’s, Merewether – COLA Lights
- Catholic School’s Office – Essential Services Pilot Study
- St John’s, Dubbo
- St Peter’s Maitland – Defects Inspection
- St Pius X HS – New Theatre Power Supply Upgrade
- St Joseph’s, Lochinvar – Phone, Bell & PA Upgrade
- St Benedict’s, Edgeworth – electrical Capacity
- St Joseph’s Lochinvar – Science Lab Refurb
- St Francis Xavier, Hamilton – Lift & Access Upgrade
- Chisholm Catholic Primary School
- St Francis Xavier, Hamilton – Courtyard
- St Brigids, Raymond Terrace
- St Michael’s, Nelson Bay
- St Peter’s, Maitland – Music & Admin
- St Nicolas, Tamworth
- St Francis Xavier – McKillop Centre
- St Francis Xavier, Narrabri
- St Francis Xavier, Gunnedah
- St Catherine’s, Singleton
- St Brigids Primary School, Coogee
- St Francis Xavier, Belmont
- St Pius X, Adamstown – Emergency & Exit Lighting
- St Pius X Adamstown – Fire Services
- Trade Training Centre’s
- Hunter River High School
- Irrawang High School
- Francis Greenway High School
- Dungog High School
- Tomaree High School
- Kotara High School
- Callaghan College, Wallsend
- Callaghan College, Waratah
- Callaghan College, Jesmond
- Scone High School
- Muswellbrook High School
- Merriwa High School
- Tamworth High School
- Oxley High School
- Manilla High School
- Peel High School
- Farrah High School
- Walcha High School
- St Paul’s High School, Booragul
- St Francis Xavier, Hamilton
- St Clares, Taree
- St Joseph’s, Aberdeen
- ASC St Mary’s, Maitland
- St Phillips, Salamander Bay
- St Peter’s, Maitland
- Technical & Further Education
- Dubbo TAFE
